-

IBM Web Mail Cloud

Deliver web mail, calendar and contact management from the IBM cloud

IBM Web Mail Cloud is a business-class messaging solution for organizations that are looking to reduce IT cost and complexity. It includes the essential email, calendar and contact management capabilities that your employees rely on each day while helping to free up valuable IT resources. IBM Web Mail Cloud is easy-to-use and administer with straightforward pricing.

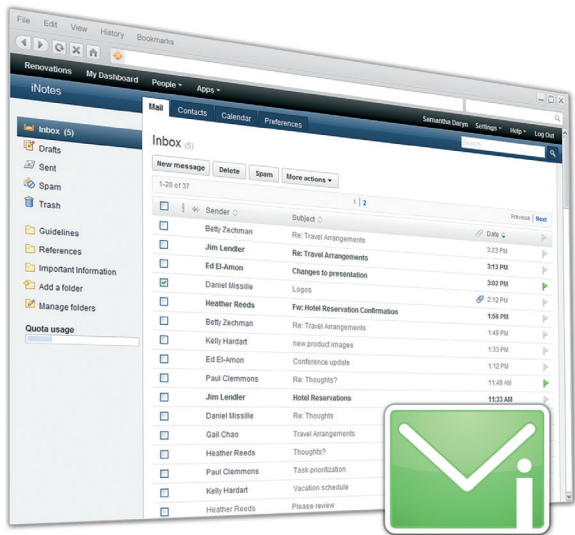

With IBM Web Mail Cloud you can give your employees access to their email from anywhere simply from a browser and an internet connection. Because IBM Web Mail Cloud supports POP and IMAP access, employees can use email client software such as Microsoft Outlook to manage their mail. They can even use IBM Web Mail Cloud from their smartphone.

IBM Web Mail Cloud gives you the best of both worlds. It helps simplify email administration, while providing robust, flexible services that enable both administrators and end users to configure the service to meet their needs.

IBM Web Mail Cloud features include:

- Essential webmail with 25 GB of storage, POP3, IMAP4, and Authenticated SMTP
- Ability to access email through Apple iPhone, Apple iPad, Blackberry, Windows Mobile, Google Android and Nokia Symbian mobile devices with auto-updates via IMAP IDLE
- SSL encryption, secure password recovery
- Personal and company-level address book for storing contacts with type-ahead searching and addressing
- Private and shared personal calendars with RSVP tracking
- Free/busy lookups when scheduling meetings with colleagues
- Mail forwarding and filtering
- Administrative tools to manage user accounts and global settings
- Built-in spam and virus protection
- Available in 22 languages
