

## IBM Security X-Force

### Minimize time, costs and exposure associated with data breaches

---

#### Highlights

- Gain expert insights to help your security team to more effectively defend
  - Develop security capabilities
  - Effectively detect and prevent attacks
- 

Data breaches and other security incidents are a fact of life, and historically incident response runs over budget and takes too long. But proactive management and preparation can improve the efficacy of managing security risk and reduce overall costs. With the right services and processes in place, it is possible to identify potential threats, detect and contain existing threats before they wreak havoc, and respond quickly in worst-case scenarios by coordinating response efforts ahead of time.

- Prevent, detect and respond to security incidents more efficiently and effectively
- Protect your intellectual property, client data, reputation and market share and achieve better control over security incidents and breaches
- Avoid a chaotic response resulting in longer recovery times and inflating recovery costs
- Prepare for and respond to threats and incidents with intelligence, across all endpoints, from mainframes to mobile devices

To address the growing need for stronger, more proactive incident response preparedness, IBM has established the IBM Security X-Force team comprised of industry-leading, highly skilled security professionals, experienced in investigating the world's largest breaches. This enhanced proactive approach is designed to help organizations prepare for, prevent, detect and respond to security incidents more efficiently and effectively to help minimize the loss of revenue and recovery costs associated with a security incident.

## IBM Security X-Force Threat Intelligence

IBM Security X-Force Threat Intelligence is foundational to an organization's security efforts, providing insights that allow your security team to be knowledgeable about threats to your environment. X-Force Threat Intelligence services include:

- Enterprise Intelligence Management
- Premier Threat Intelligence
- Threat Intelligence Program Assessment
- Strategic Threat Assessment
- Dark Web Analysis
- Malware Reverse Engineering

## IBM Security X-Force Incident Response Retainer

IBM Security X-Force Incident Response Retainer remediation and proactive services help you prepare for and respond to threats and incidents across all endpoints. Specific capabilities include:

- Incident Response and Breach Remediation
- Forensic Analysis
- Threat Assessments
- Incident Response Program Assessment and Development
- Incident Response Playbook Customization
- First Responder Training
- Tabletop Exercises and Scenario Testing
- Managed Detection and Response

## Why IBM?

The IBM Security X-Force team is comprised of highly skilled experts with decades of leading-edge incident management and security intelligence experience, having worked on hundreds of the world's biggest breach investigations in both the public and private sectors. The global team possesses a depth and breadth of cross-competency security knowledge that is unparalleled.
