

Systems for AI. Ready for today, Built for Tomorrow

DES Digital Business World Congress 2019

Today's state of the art: image captioning example

Natural language description of an image created using reinforcement learning End-to-end model trains a language and image network simultaneously

the side of a building" top of a bowl"

"A blue boat is sitting on "A green bird sitting on

"A woman sitting on a table with a giraffe"

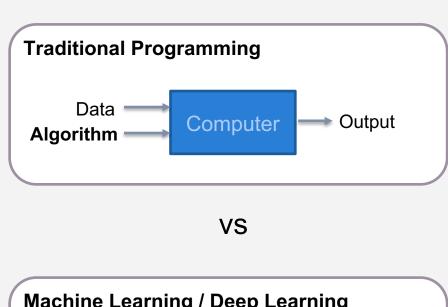

Rennie, Marcheret, Mroueh, Ross & Goel, "Self-Critical Sequence Training for Image Captioning." CVPR 2017

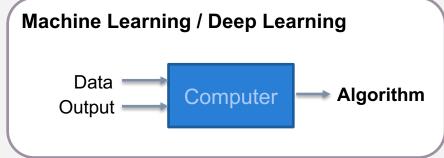

What is AI?

Artificial Intelligence Machine Learning Neural Networks Deep Learning

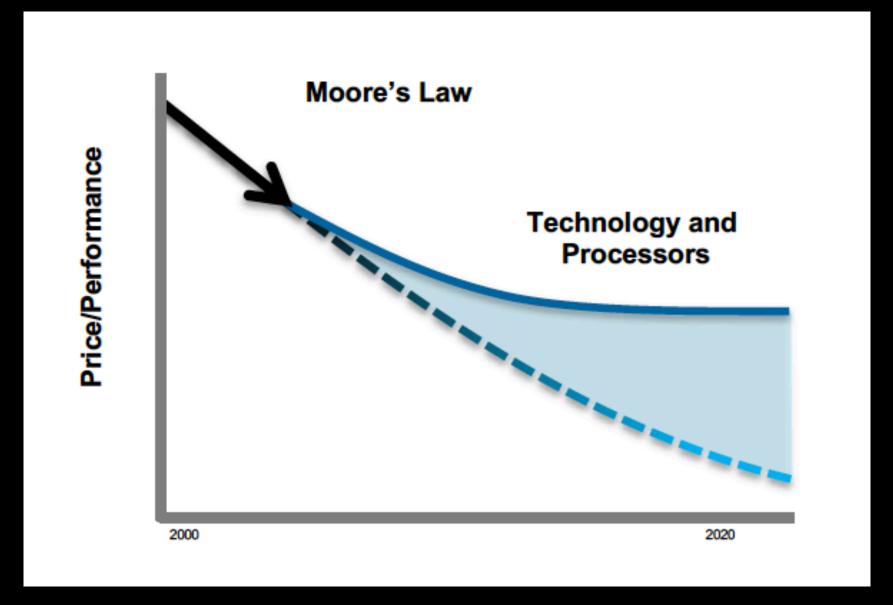

Al is all about making new Algorithms!

End of Moore's Law: It's not Just About Physics

Data Explosion. Exponential Growth

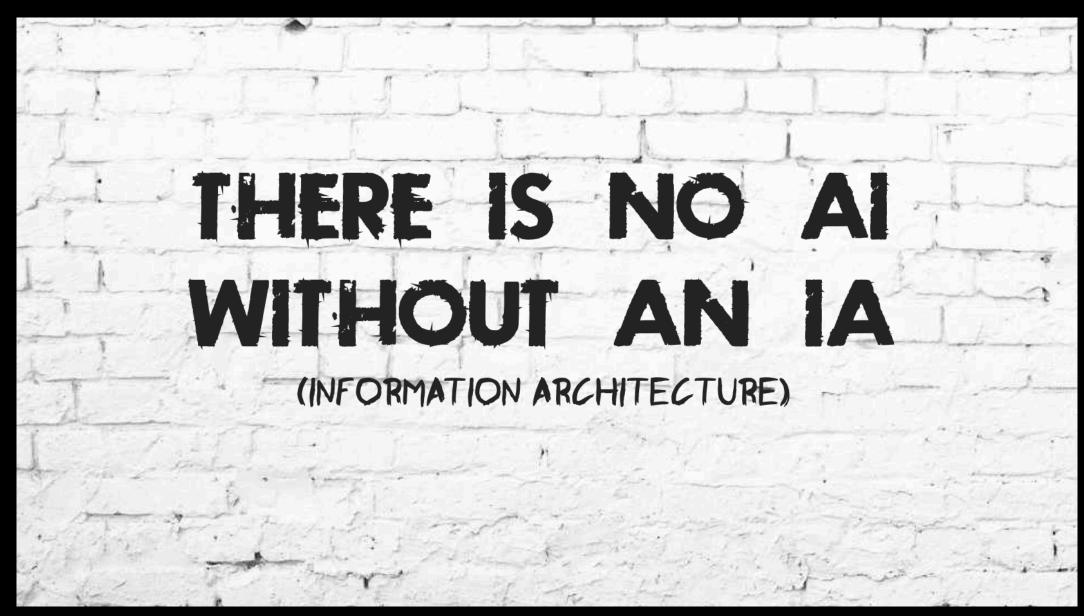

A cow alone generates 200MB of data every year

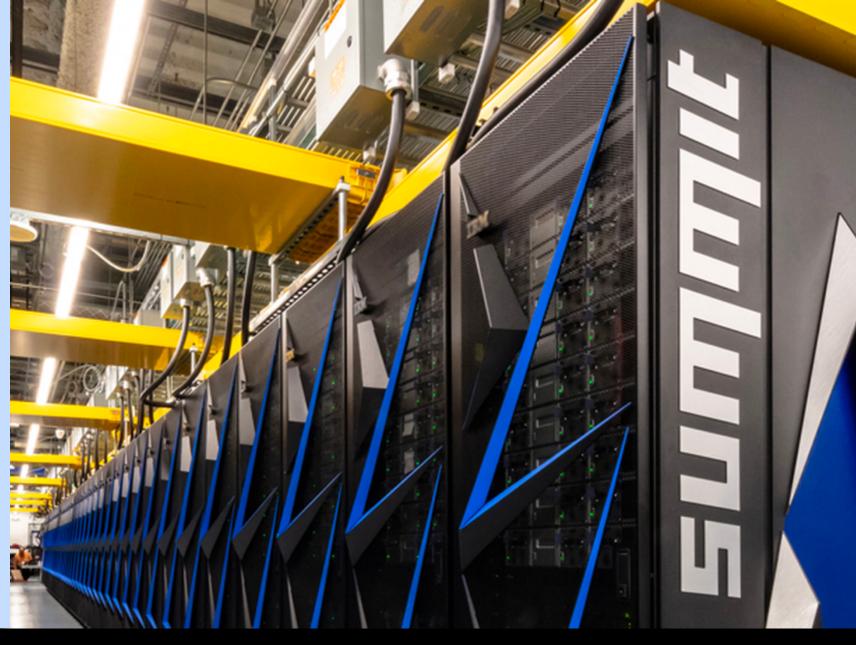

#1 & #2 Supercomputers built for Al

Summit and **Sierra** are the fastest computers in the world and purpose-built for Al workloads.

Together, more than 44,000 NVIDIA GPUs and 400 Petabytes of IBM Storage

- 2.5 TB/sec single stream IOR
- 1 TB/sec 1MB sequential read/write
- Single Node 16 GB/sec sequential read/write
- 50K creates/sec per shared directory
- 2.6 Million 32K file creates/sec

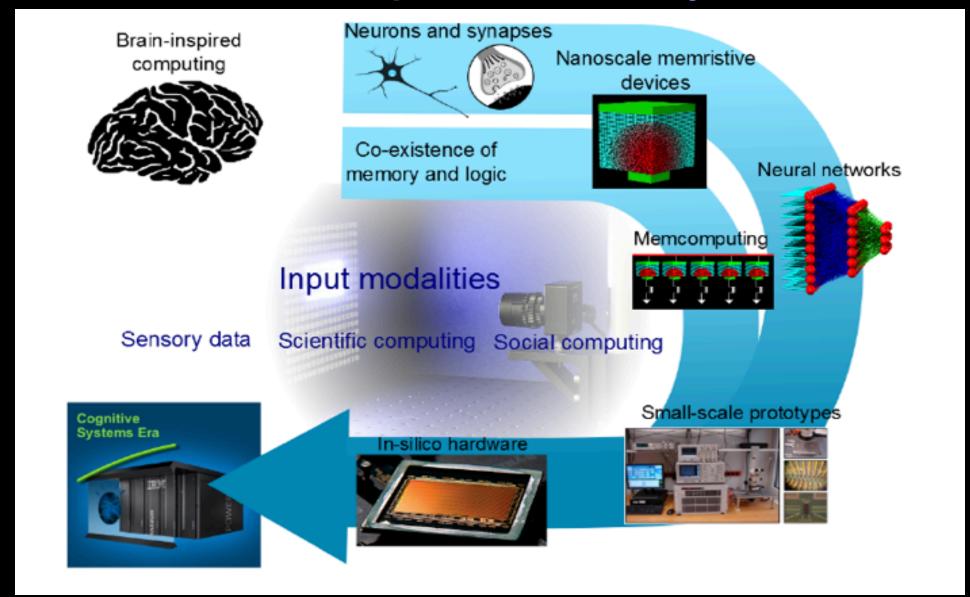

Next Generation PCM for Computational Memory

Next Generation Neuromorphic processors

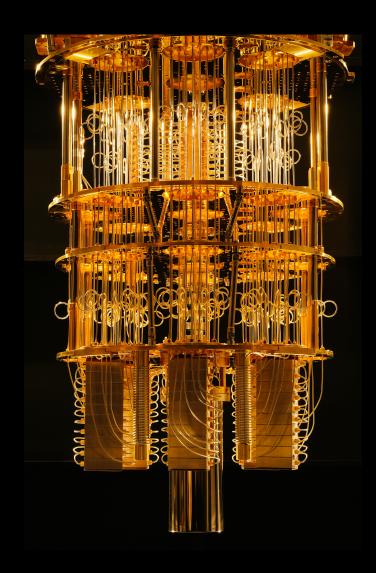

Quantum Computing is a Reality

Adding an additional qubit means to double the compute power

16 qubits
IBM Q 16 Melbourn
16 qubits
IBM Q 16 Rüschlikon
5 qubits
IBM Q 5 Tenerife
5 qubits
IBM Q 5 Yorktown

Private Computers

20 qubits
IBM Q 20 Tokyo
20 qubits
IBM Q 20 Austin
50 qubits
Soon
