Why you'll love it

IBM Food Trust uses blockchain technology to create unprecedented visibility and accountability in the food supply. It's the only network of its kind.

Proof points:

- One of the largest non-crypto blockchain networks in the world.
- 5M+ food products have reached retail shelves.
- Early adopters digitized—1,200 SKUs representing 4M+ transactions.
- 200K traces have been conducted to date.
- Our network includes 50+ clients and growing.

TradeLens uses IBM Blockchain technology as the foundation for digital supply chains, empowering multiple parties involved in international trade.

Proof points:

- More than 150 organizations have been onboarded, including 11 ocean carriers, three inland carriers, more than 40 worldwide ports and terminals, large global freight forwarders, and eight customs authorities spanning the globe from Canada to Australia.
- Captured over 500 million shipping events each year, over 1.5 million each day.
