

Try IBM Machine Learning for z/OS

Join the IBM Community Cloud and get free hands-on experience

IBM invites you to test drive IBM Machine Learning for z/OS.

Explore this innovative software with no infrastructure investment and no installation.

You will:

- Learn to develop, deploy and manage a self-learning predictive behavioral model
- Gain 100% complimentary, open access to an enterprise grade environment for machine learning
- Not need any experience with IBM Z or z/OS systems
- Get up and running in minutes with minimal setup
- Follow a *Quick-Start Guide* to build an example machine learning model
- Have access to IBM and an on-line support community

Data is everywhere and organizations are looking for new ways to uncover valuable insights.

[IBM Machine Learning for z/OS](#)

offers a complete machine learning solution that can extract hidden value from enterprise data in a security rich environment.

Machine Learning for z/OS helps organizations quickly ingest and transform data to develop, deploy and manage high quality self-learning behavioral models using IBM Z data, securely in place and in real time, to more accurately anticipate customer and business needs.
