IBM Mail migration services

You want to move to IBM cloud mail pain free in the fastest time possible, lowest cost and highest fidelity. You may be using another IBM messaging product or a competing product. Tap into our worldwide proven experience migrating mail for a smooth transition from on premise to Cloud, to minimize impact and disruption, to begin leveraging your cloud investment sooner

Here is how this partnership is organized:

During this project IBM will do the following:

Work with your team on upfront planning and preparation for the cloud migration.

Provide prerequisites for Hybrid installation

Install the hybrid infrastructure

Install the required migration tooling

When your remediation and planning is complete. IBM will move your email, contact and calendar data into IBM Verse directly from existing email platform.

We will send reports on upgrade status including completed upgrades and unresolved errors that need to be addressed.

Provide IBM Verse technical experts to provide assistance to your company in resolving any technical issues during the transition and provisioning to the cloud

Our customers need to:

Meet the minimum requirements for the Smart Cloud Upgrade Factory project and IBM Verse

Give IBM impersonation. Or service account access to your email so we can access and move your data to the cloud,

Continue to manage your existing mail platform until we've upgraded each user to IBM Verse.

Provide to IBM at least 300 mail accounts per day to migrate, 1500 to 2500 mailboxes per week

Communicate, train and support your users during the upgrade process.

1) Experience Smooth transition from on premise to Cloud

2) Minimal impact and disruption

3) Begin to leverage Cloud investment sooner

4) No need to purchase 3rd party migration tools

5) Proven "Factory process"

Achieve an impressive migration speed and leave out undue risk by partnering with IBM dedicated professionals. They will apply their expertise and the latest high fidelity conversion tools to your needs. And to ensure nothing slows down this effort, they also provide Level2 help desk support to quickly resolve any activation or conversion issues.
