

# Full platform deployments

To make the best decisions for your organization, you need the full picture of what's working

As the saying goes, two is better than one. And that's definitely true when you're referring to Workday deployments. Why just deploy Workday Financial Management when you can also deploy Workday Human Capital Management (HCM) and operate with a complete picture of your organization? With a Full Platform deployment (Workday Financials and HCM), all your data is in one place, you can align your people and financial performance and embrace change across the enterprise.

The benefits of a Full Platform deployment are many. For example: All of your data is in one place and it's updated in real time. You can align your people and financial performance, keep your workforce engaged and supported, and embrace change across the enterprise.

Many organizations gain a strategic edge to their business by taking advantage of the synergies between finance and human resources (HR)—doing so helps them achieving greater visibility into the people, operations and financials of the business, while promoting improved efficiencies, consistencies and accountability.

When it comes to Full Platform deployments, whether you're taking a "big bang" or phased approach to your Full Platform project, IBM understands the complexities and advantages. We provide the experience and expertise that defines our customers' success.

With a focus on client success, solving challenges and finding new ways to deliver additional value, IBM helps you:

- Decide between a "big bang" or a phased deployment
- Understand your organizational profile and what you can handle
- Save time and money by having Workday Financials and HCM in one deployment
- Handle project and change management

## Highlights:

- Quickly move your business strategy from concept to execution
- Navigate past budget obstacles that stand between your current environment and your business goals.
- Focus on client success and finding new ways to deliver additional value

Your business has its own unique challenges. IBM's Workday practice focuses on effective and efficient use of everything that Workday has to offer, combining Workday capabilities with best practices and proven methodologies, to deliver a customized solution to help you achieve your goals:

- Greater visibility into people, operations and financials
- Real-time accurate reporting
- Being set up for successful future growth
- Best practices gained from deploying Workday Financial Management and HCM together

## Client satisfaction

With an exceptional client satisfaction rating, IBM's Workday practice has an unwavering commitment to client success and serves a diverse client base across medium and large enterprises in North America and Canada. Our clients are multinational leaders and innovators across a wide range of industries—including technology, financial services, education and government, manufacturing, retail and others.

Statement of Good Security Practices: IT system security involves protecting systems and information through prevention, detection and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed or misappropriated or can result in damage to or misuse of your systems, including to attack others. No IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products or services to be most effective.

**IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.**
