

IBM API Connect

Create. Run. Secure. Manage.

#1

Companies are going through a digital transformation!

Businesses are looking to provide services for customers where and when they want them.

#2

APIs are essential !

Consumers are looking for compelling, omni-channel brand experiences.

#3

If you're not disrupting, you're being disrupted!

Businesses need to compete against competitors that are offering enhanced that customers are looking for

Simplify your journey into the API Economy

Introducing IBM API Connect, the only comprehensive API management solution that addresses all four aspects of the API Lifecycle: creating, running, securing, and managing APIs.

Create
APIs in minutes

microservices

Manage
APIs with Ease

API Connect is IBM's API Management solution that provides:

- An end-to-end integrated experience across the API life-cycle, which reduces cost and simplifies application development.
- Automated API creation and discovery from systems of record for rapid time to market.
- Self-service access to APIs to speed discovery and consumption by developers, while also providing security and governance controls for IT operations.
- Unified management and administration of Node.js and Java plus support for multiple development languages and frameworks to enhance developer productivity and reduce dependence on central IT.
- Hybrid cloud licensing model for seamless platform flexibility and lower cost of ownership.

Four key benefits that API Connect can deliver your organization:

Fast Results with better app quality for developers

Developers can easily discover existing APIs and back end data sources and create new APIs faster with model driven tools. This leads to a shorter time to market.

Simplicity and reduced risk for IT managers and architects

API Connect allows IT managers to expose selected information assets to Developers. API policies are enforced to ensure access and usage are in line with enterprise requirements.

New revenue and extended brand reach for business analysts

Business analysts can use API Connect's analytics to see which APIs are having the most impact. They can also decide which APIs to monetize by charging 3rd party developers to use them.

Innovation and growth for LoB managers

Using the built in analytics to gain customer and competitive insights, LoB managers can better manage their market initiatives, including creating new business models that will allow them to compete in the API economy.

Flexible offerings that grow with your needs

API Connect provides seamless portability between on-premises and cloud services. This flexibility enables organizations to avoid the expense and complexity of multiple licensing arrangements for hybrid hosting. API Connect is available in three offerings with flexible licensing so organizations can start slow and easily scale up to meet growing demands. API Connect offers three subscription licenses based on API Calls per month:

API Connect Essentials

A no charge offering targeted to developers, API Connect Essentials provides a complete foundation to create, run, manage, and secure APIs, plus up to 50,000 API calls per month.

API Connect Professional

Designed for departmental use, API Connect Professional includes high availability support, analytics, Node.js and Java run times, an integrated micro-gateway, and up to 5 million API calls per month.

API Connect Enterprise

Intended for enterprise use, API Connect Enterprise provides multi-data center high availability capabilities, advanced analytics, Node.js and Java run times, an advanced gateway and up to 25 million API calls per month.
