

# Accelerate content management and governance processes

Easily store, share and search content while maintaining a single source of truth

Content is growing exponentially in every organization, and it can be a challenge to find the most up-to-date information while maintaining compliance and ensuring content governance. According to Forrester, knowledge workers lose an average of 1.4 days every week just creating, reading or searching for information.<sup>1</sup> Companies buried under mountains of content need a better solution.

IBM® Content Services is built on a modern cloud infrastructure to accelerate content management and governance. Quickly search, preview and view content across the enterprise with assurance that it's the correct content you need. Say goodbye to content silos and the chaos of accidental deletions and duplicates.

As a cloud-native service hosted on AWS modern architecture, it's easy to get into production in minutes, rather than days. Take the hassle out of provisioning and setup by automatically receiving the latest updates with this IBM-managed SaaS platform.

IBM Content Services offers APIs that enable easy integration with your existing applications. Moving to this SaaS offering is simpler for IBM® FileNet® Content Manager clients because of the consistent metadata and security model. Content is uploaded, shared and managed in a security-rich environment—even on mobile devices. Maintenance workers have the latest manuals at their fingertips, insurance adjusters smoothly settle claims from the field, physicians have patients' records and your customers can start accounts from anywhere.

Security and governance are paramount to IBM Content Services. Consistently and intelligently apply unified content governance processes with granular and flexible access control. Make documents accessible by only certain departments, and even make redactions of sensitive information inside documents.

Modernize with ease with an out-of-the-box user experience, preconfigured with the features and capabilities to get your business up and running quickly. Streamline your content management processes to accelerate payments, verifications, customer approvals and more. Make your operations more efficient, and your partners and customers more satisfied.

Reduce turnaround times and improve customer experiences.

Mitigate compliance risk and avoid content silos and content chaos with one unified view.

Access content where you need it most.

Learn how IBM Content Services helps you make sure the right people in your organization get the right information every time.
