

Watson Health technical specifications

Client machine configurations
for IBM Explorys EPM
Application Suite

Technical requirements for IBM® Explorys EPM Application Suite

Operating systems

Minimum	Recommended
Windows 7	Windows 7 or later
Mac OSX 10.8	Mac OS X 10.9 (Mavericks) or later

Browsers

Minimum	Recommended
Microsoft Internet Explorer 8*	Latest non-beta version of Microsoft Internet Explorer
Chrome 32	Latest non-beta version of Chrome
Firefox 27	Latest non-beta version of Firefox
Safari 6.2	Latest non-beta version of Safari

Client machine

Item	Minimum	Recommended
RAM	2 GB	4GB or higher
Processor	1.4 GHz	2.4GHz or higher
Graphics resolution	1024 x 768	1280 x 800 or higher
Network connection speed	400 Kbps	500 Kbps

*User administration requires Internet Explorer 9 or later

Note: All machines accessing Watson Health™ must be HIPAA enabled (such as local storage encryption, etc.)

About IBM Watson Health

In April 2015, IBM launched IBM Watson Health and the Watson Health Cloud platform. The new unit will work with doctors, researchers and insurers to help them innovate by surfacing insights from the massive amount of personal health data being created and shared daily. The Watson Health Cloud can mask patient identities and allow for information to be shared and combined with a dynamic and constantly growing aggregated view of clinical, research and social health data.

The information in this document is provided “as is” without any warranty, express or implied, including without any warranties of merchantability, fitness for a particular purpose and any warranty or condition of non-infringement.

IBM products are warranted according to the terms and conditions of the agreements under which they are provided.

Statement of Good Security Practices: IT system security involves protecting systems and information through prevention, detection and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed or misappropriated or can result in damage to or misuse of your systems, including to attack others.

No IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.
