* These features and companion Programs are associated with the IBM subsystem under which they are listed. If the subsystem has S/390 Usage Pricing Charges, then (1) the features must also have, and (2) the companion Programs may have, at your option, S/390 Usage Pricing Charges. If the subsystem does not have S/390 Usage Pricing Charges, then the features and companion Programs are not eligible for S/390 Usage Pricing Charges. Features and companion Programs usage is not measured separately. Their charges are determined by your usage of their associated IBM subsystem. The IMS Extended Terminal Option (ETO) feature requires the IMS Transaction Manager feature. If IMS/ESA V6 Transaction Manager is not running, charges for the IMS/ESA V6 RSR-DLT and RSR-RLT features are determined by your usage of IMS/ESA V6 DB Manager. If IMS V7 or later Transaction Manager is not running, charges for the respective version IMS DLT and RLT features are determined by your usage of the respective version IMS DB Manager.

^ These programs and their features are also eligible for Select Application License Charges (SALC).
