

“IBM Cloud Brokerage Services helped us meet business unit needs for fast, compliant computing environments. Plus, we’ve improved cloud management.”

— Manufacturer’s spokesperson

Business challenge

Operating thousands of physical servers grew increasingly complicated for this company. At the same time, manual processes for procuring server space slowed app development, test and production.

Transformation

IBM® Cloud Brokerage Services provided this manufacturer with a catalog of vetted, quickly deployable public cloud offerings, pre-programmed with the necessary boot scripts, security protocols and management capabilities needed for isec compliance. The solution also clarified costs for each workload, enabling more accurate auditing and chargebacks.

Business benefits

Reduces

time to deploy computing environments from days to hours

Automates

deployment with reusable design templates

Discovers

assets to determine cost per workload, create financial reports, audit trails

Major manufacturer

Reducing deployment times with secure, compliant and easily managed public cloud services

This publicly held multinational manufacturer has annual revenue in the billions. It employs more than 100,000 people in dozens of manufacturing plants worldwide. Building on its history of innovation, the company now focuses on designing more energy efficient products.
