IBM Consulting Cloud Accelerator for Microsoft Cloud

Chart your path to cloud modernization

What if you had a GPS to accelerate your journey from planning to execution?

Hybrid cloud helps organizations respond to market needs faster, unlocking agility and real value. Organizations can optimize processes while shrinking expenses and modernizing mission-critical applications—even while employees and customers continue to seamlessly interact with those applications.

Today, businesses of all kinds are embracing hybrid cloud. Although the advantages of hybrid cloud are clear, the path to getting there isn’t.

What if your cloud journey came with a roadmap?
Imagine if you could chart your entire cloud journey before you even began. The IBM Consulting™ Cloud Accelerator is designed to de-risk modernization on Microsoft Cloud. Powered by the knowledge and expertise IBM Consulting has gained by leading numerous successful hybrid cloud migrations, our accelerator maps the most effective pathway based on your desired business outcome.

Our purpose-built IBM Consulting Cloud Accelerator helps you with accelerated planning and low-touch execution through built-in expert rules, automation tooling, playbooks and starter code. The journey framework provides the most optimized path from planning to execution and enables you to move different types of mission-critical applications to Microsoft Cloud with consistency and confidence in real time. It also offers you the flexibility to replatform middleware by containerizing applications on Azure Kubernetes Service (AKS), rehost apps on Azure virtual machines (VMs) or refactor and build apps on Azure Functions or AKS.

With the IBM Consulting Cloud Accelerator, the hypothetical becomes hyper-practical on your Microsoft Cloud journey. You can design different migration and modernization paths beforehand, laying out potential modernization programs and cost delivery

Making the complex easy—without the risk
The IBM Consulting Cloud Accelerator for your Microsoft Cloud automates many modernization tasks, reducing complexity while increasing the speed and agility of your business. And automation frees our experts to focus—along with you—on delivering desired business outcomes faster.

IBM Consulting and Microsoft have been in partnership for over 30 years, creating innovative solutions that serve our clients better, bring value and differentiate our alliance and is one of the fastest growing global system integrators (GSIs) for Azure Consumption Revenue (ACR). We are a Microsoft Gold Partner in several categories, including data analytics, data center, DevOps, security and enterprise resource planning (ERP).
