

Improve performance and security, while reducing costs for your enterprise and performance-intensive applications with **Oracle Cloud Infrastructure**, implemented and managed by IBM Services

## Oracle Cloud Infrastructure

Oracle Cloud Infrastructure is an enterprise cloud that delivers a set of platform cloud services including powerful compute, storage and networking capabilities optimized for Oracle applications.

Built from the ground up, Oracle Cloud Infrastructure supports legacy workloads while delivering modern cloud development tools, from application development and business analytics to data management, integration, security, artificial intelligence (AI) and blockchain; enabling enterprises to bring their past forward as they build their future.

To help optimize your investment in Oracle enterprise applications, IBM Services can deliver the combination of business and technology skills you need to modernize, run, manage and secure your mission critical applications on Oracle Cloud Infrastructure.

IBM Services can deliver the combination of business and technology skills you need to modernize, run, manage and secure your mission critical applications on Oracle Cloud Infrastructure leading to:

- 50% faster production-ready using IBM automation for all Oracle ERPs
- 70% efficiency increase due to reduction in manual tasks

Compute

Analytics and Big Data

Storage

Management and Governance

Networking, Connectivity and Edge Services

Integration

Security, Identity, and Compliance

Application Development

Database Management

Emerging Technologies

# IBM Services

**To help optimize your investment in Oracle applications, IBM Services can:**

**Accelerate with Operational Excellence**

- Industry leading service powered by certified staff and proprietary tools:
  - Automate 75% of routine manual tasks to build and manage OCI using our proprietary automation and monitoring tool OCTA
  - Smart OEM library to extend, calibrate and optimize monitoring of Oracle Applications and database
  - IBM DART tool offering 50+ custom queries to perform preventive database maintenance and rapidly identify root cause
  - Fully automated Code Deployment tools for CEMLI deployment
  - IBM Digital Workers providing automation and self-healing in order to reduce downtime by 20% and ticket creation by 25%
  - AI based tools built into Managed Applications platform to execute preventive maintenance, reduce false alarms and gain insight into high volume operational data
  - Integrated with ServiceNow for help desk support automation

**Reduce risk with built-in Security Services**

- Ranked #1 in Security Services by analyst\*
- Built in certification for regulatory compliance, embedded with Industry standards (e.g. HIPPA, PCI, ITIL, ISO, SOC Compliance)
- IBM Security services to support OCI including Anti Virus, Penetration Testing, IAM, SIEM and DDOS

**Simplify Oracle service requests with a single Unified Service Portal**

- Our Unified Client Portal is a one stop shop for analytics, monitoring, managing multi cloud workloads delivering a secure, scalable, and flexible managed Oracle platform on OCI

**Operate mission critical applications with confidence and certainty**

- Lean on IBM's experience of 20+ years as the world's largest Managed Services provider ranked #1 by Gartner in Hybrid Cloud migrations and data center management delivering world class SLAs backed by 40K+ Hybrid Cloud consultants

**Why IBM Services**

IBM is one of Oracle's most significant partners, with a 34-year partnership and Platinum Level and Cloud Elite status. IBM has more than 10,000 dedicated Oracle consultants and has helped clients successfully complete more than 6,500 Oracle projects. IBM offers services to help you at each stage of your Oracle investment, from consulting to implementation to management.

World's largest Managed Services Provider for 20 years

Platinum and Cloud Elite

400+ Oracle Cloud Infrastructure certified consultants

Specialized in Oracle Infrastructure as a Service

Leader for Oracle Application Cloud Services; ranked by Forrester and Gartner
