- Includes all open sources of data
- Leverages a single platform with a common application layer
- Write once and deploy anywhere

Unified Governance & Integration

- Satisfy all matters of finding, cataloging and masking data
- Integrates fluid data sets
- Delivers built-in compliance
- Leverages advanced machine learning capabilities

Data Science & Business Analytics

- Delivers descriptive, prescriptive and predictive insights across all types of data
- Empowers all your teams and their unique use cases
- Enables advanced analytics and data science methods

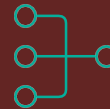

IBM Hybrid Cloud Integration Topics

Digital Business Automation

- Leverage business automation to business advantage
- Do more with less by automating, augmenting, enhancing critical processes and decisions

Integration and Development

- One platform for simple, fast, and secure multi-cloud integration

Management and Platform

- The best of cloud, agility, and security -- whether off-premises public, dedicated cloud, on-premises private cloud, or any combination

How it Works – Your Agenda, Your Way

Choose Your Site

We'll come to you or we can host at an IBM facility or third-party venue.

Choose Your Format

1- or 2-day agenda options available.

Choose Your Topics

Course content will be customized to you and your business needs.

We'll Design Your Program

Dynamic keynotes, special guest speakers, hands-on demos, workshops and more.

Contact your IBM
Representative to
schedule your
Global Elite event.
