85% category average
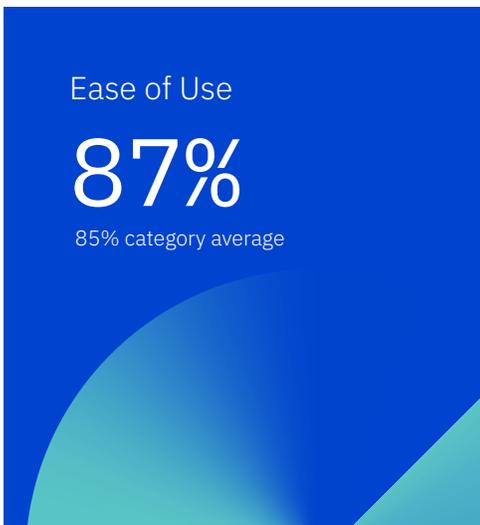

"The tool is fabulous and works well to manage the changing business requirements. Its a tool that helps you in your day to day risk assessments and scalability."

- G2 Reviewer ★★★★★

Ease of Admin

86%

85% category average

"The product helps to identify threats or vulnerabilities hiding in the system and to find a quick solution to them. The rules and offenses can be used to work on threat secure policy. The IBM app for integration of many SIEM tools to gather logs and work on them is top-notch."

- G2 Reviewer ★★★★⯪

Review Star Breakdown

of users rated us
4 or 5 stars
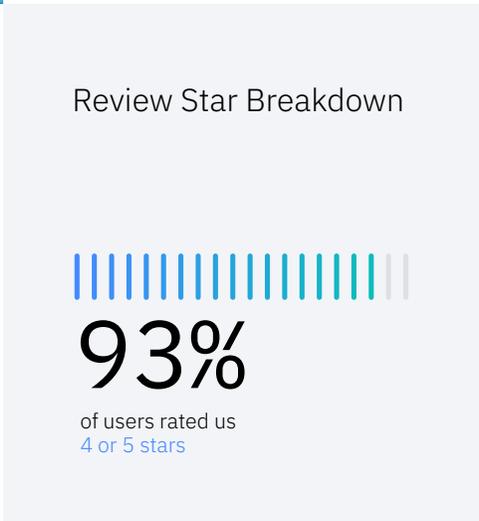

This tool provides you with the capability to scan your network in real-time. Incidents can be identified and captured based on live network traffic and by using IBM's intelligence service which is backing this tool, it sends out notifications which can help prevent malicious activities, before they even happen."
