

How can investment banks gain a single view of risk across their trading and banking books?

ABSA Bank's Corporate and Investment Banking division uses an IBM® Algo® solution to provide a single, accurate view of counterparty credit risk.

85% faster insight into counterparty credit risk

\$2.3 million in net present value

51% internal rate of return

“At the click of a button, we can now see all the limits and exposure for any CIB counterparty.”

Dale Vice, Head of CIB Credit Change
