## Highlights

- Helps limit business disruption with a more predictable implementation
  - Uses the expertise of a skilled storage specialist to help implement Storwize V7000 Unified more effectively
  - Helps realize the benefits of the virtualized storage system with a faster and more efficient implementation
- 

# Implementation services for IBM Storwize V7000 Unified

*Enable a more efficient implementation of your  
Storwize Unified system*

Without the right skills and expertise, implementing IBM Storwize® V7000 Unified can be challenging. You face the risk of data loss, application downtime, outages and increased costs if the implementation is not properly planned and executed. An improper implementation can also delay the return on your storage investment. With your in-house staff engaged in other critical tasks, you may need the assistance of experienced implementation specialists to carry out a more streamlined and efficient implementation.

IBM Implementation Services for disk systems – IBM Storwize V7000 Unified is designed to facilitate a faster and more efficient implementation of Storwize V7000 Unified with less impact to your business operations. Our storage specialist helps you plan, install, configure and test the virtualized storage system and can also provide basic skills instruction to your key in-house personnel. We use time-tested project management methodologies to facilitate the delivery of an on-time, on-budget implementation that helps accelerate the return on your storage investment.

## Helping reduce business disruption with a more predictable implementation

By leveraging strong project management skills and methodologies, an IBM storage specialist can enable a more streamlined implementation of the Storwize V7000 Unified storage system to help limit business disruption. Our skilled storage professionals are well-versed in implementing Storwize storage systems and are trained to identify and mitigate potential risks throughout the implementation process.

## Using the expertise of an IBM storage specialist for better implementation

We provide the services of a skilled storage specialist to help implement the new Storwize storage system, allowing your in-house resources to stay focused on other critical tasks. Our storage professional helps deliver an end-to-end implementation service that includes more efficient planning, implementation, configuration assistance and testing. In addition, we can provide basic skills instruction on the implementation and IBM Storwize V7000 Unified to your key in-house personnel.

## Facilitating faster and optimal realization of return on investment

With proper planning of the entire implementation process, we help facilitate a more efficient implementation of Storwize V7000 Unified in your IT environment. By enabling an on-time, on-budget implementation, you can realize an improved return on your storage investment. Our systematic implementation process helps you more quickly realize the benefits of an improved storage environment while increasing your storage capacity to address accelerating data growth.

## Why IBM?

IBM is one of the leading providers of implementation services for Storwize storage systems. We offer the services of skilled storage specialists who are experienced in implementing Storwize storage systems for many companies. Our storage personnel leverage project management skills to help implement IBM Storwize V7000 Unified more efficiently. We offer the opportunity to work with a single vendor for your storage hardware, software and implementation needs.
