

Ease your journey to AI

Automate, govern and process data at scale with IBM Cloud Pak for Data

Enterprises need to modernize their data architectures to keep up with the growing scale of data and analytics needs. The modern-day enterprise needs an agile platform that's scalable and makes AI more accessible.

IBM® Cloud Pak™ for Data offers businesses an extensible, cloud-native data and AI platform that runs on any cloud and modernizes how they collect, organize and analyze data while implementing AI throughout the organization.

Cloud Pak for Data at work

**Projected results*

Reduce infrastructure management effort by **65–85%**
