---

## Overview

---

IBM<sup>(R)</sup> announced that IBM Power<sup>(R)</sup> Systems Private Cloud Solution delivers business continuity and cloud agility with options for pay-for-use consumption of compute resources for IBM Power System S924 (9009-42G) and IBM Power System S922 (9009-22G) servers in Hardware Announcement [120-044](#), dated July 14, 2020.

The information in that announcement is updated as follows:

- A Private Cloud Capacity Assessment and implementation service from IBM Systems Lab Services is offered for a system with IBM Power Enterprise Pools enablement feature EP20 and can be requested for qualifying Power servers. Contact your IBM representative for more details and pricing.
- Elastic Capacity is not supported across a collection of Power S924 or Power S922 servers.
- Memory activation and metering are not enabled for Power S924 and Power S922 servers; therefore, a minimum of 256 GB of memory is required for the Power Systems Private Cloud Solution.

---

## Effective date

---

August 25, 2020

---

## Reference information

---

For additional information on Power Systems Private Cloud Solution for Power S924 and Power S922 servers, see Hardware Announcement [120-044](#), dated July 14, 2020.
