At a glance

IBM Spectrum Protect™ Plus V10.1.3 delivers new application support for MongoDB and Microsoft™ Exchange Server, optimized offload to IBM Spectrum Protect Server, and offload to object storage. IBM Spectrum Protect V8.1.7 delivers features for optimization for long term data retention.

Overview

IBM Spectrum Protect V8.1.7 delivers new capabilities:

- New data retention sets enable you to create point-in-time collections, leveraging existing backup data to satisfy long-term data retention requirements
- Enhanced diagnostics for first failure data capture
- Simplified and secure web-based portal for remote file-level recoveries

IBM Spectrum Protect Plus V10.1.3 delivers new application support and performance enhancements:

- Optimized offload to IBM Spectrum Protect Server
- New offload to IBM Cloud™ Object Storage and IBM^(R) Cloud Object Storage System™, as well as other public cloud-based object storage, for long-term data retention and disaster recovery
- Support for MongoDB enables protection and reuse of business-critical data stored in MongoDB databases
- Support for Microsoft Exchange Server
- High availability of IBM Spectrum Protect Plus Server through VMware and Hyper-V high-availability services
- Enhanced RESTful API enables easier and faster time to value for reporting and analytics

Key requirements

See the specific websites listed in the [Software requirements](#) section for a complete list of devices that are supported by IBM Spectrum Protect (5725-W98), IBM Spectrum Protect Extended Edition (5725-W99), and IBM Spectrum Protect for Data

Retention (5725-X15). Libraries that have more than four drives or more than 48 tape slots require a license for IBM Spectrum Protect Extended Edition.

Planned availability date

February 22, 2019 (Electronic download only)

See the [Availability of national languages](#) section for national language availability.

Description

IBM Spectrum Protect V8.1.7

Data retention sets

IBM Spectrum Protect streamlines the collection and management of data retention by leveraging existing operational recovery data to satisfy long-term retention requirements, eliminating the need to ingest additional copies. Policy rules track and manage the data through its operational and retention lifecycle without making an additional copy, saving space and time. Any data that resides only in retention sets is eligible for the IBM Spectrum Protect Suite -- Archive Option.

Enhanced diagnostics for first failure data capture

This feature can expedite problem resolution time with IBM Support by optimizing data collection and automatically gathering vital system data ahead of time.

Simplified and secure web-based portal for remote file-level recoveries

This new interface enables you to remotely recover a file on a machine managed by IBM Spectrum Protect Backup Archive without direct login access to the target machine. The interface will also enable remote recovery if the target machine does not have the backup archive interface, for example, when working in zLinux environments. This new interface in IBM Spectrum Protect replaces the deprecated web client.

IBM Spectrum Protect Plus V10.1.3

Optimized offload to IBM Spectrum Protect Server

IBM Spectrum Protect Plus leverages incremental-forever backup technology to streamline offloads of all backups (including VMs and databases) from vSnap to IBM Spectrum Protect, eliminating the dependency on IBM Spectrum Protect for Virtual Environments. This delivers a unified data protection policy, all managed by the IBM Spectrum Protect Plus service level agreements (SLAs).

Offload to object storage

IBM Spectrum Protect Plus offers additional protection by enabling offload of backups (including VMs and databases) from the vSnap server to on-premises object storage or to public cloud-based storage for long-term data protection and disaster recovery. IBM Cloud Object Storage, IBM Cloud Object Storage System, Amazon Web Services S3, and Microsoft Azure Blob are supported. Retention setting for WORM-policy enabled IBM Cloud Object Storage and IBM Cloud Object Storage System is also supported.

Support for MongoDB

IBM Spectrum Protect Plus storage administrators and MongoDB database administrators can now protect and reuse business-critical data stored in MongoDB Community Edition and Enterprise Edition databases running on Linux[®] x86 systems. Data reuse options include instant access to support rapid verification and

testing, test restore operations to support DevOps, and full restore-to-production operations.

Support for Microsoft Exchange Server

IBM Spectrum Protect Plus adds support for Microsoft Exchange Server, enabling you to leverage the ease and power of IBM Spectrum Protect Plus SLAs to schedule and manage the data protection of Microsoft Exchange server databases. This support also provides individual mailbox item-level restore functionality.

High availability

IBM Spectrum Protect Plus Server enables high availability through integration with VMware and Hyper-V high-availability services.

Enhanced RESTful API

IBM Spectrum Protect Plus enables you to save time with RESTful API enhancements that provide storage administrators and other users with a simplified interface to collect reporting and analytics information about their data protection and data reuse environment.

IBM Spectrum Protect has been updated to support the following:

- IBM Spectrum Protect server support for TS1160 Tape drives
- IBM Spectrum Protect Operations Center support for client distribution for the Ubuntu Debian client packages
- IBM Spectrum Protect for Mail support for Microsoft Exchange Server 2019

Accessibility by people with disabilities

A US Section 508 Accessibility Compliance Report containing details on accessibility compliance can be found on the [Product accessibility information](#) website.

Reference information

For complete product information about IBM Spectrum Protect, see Software Announcement [218-316](#), dated August 24, 2018

Availability of national languages

There is only electronic availability. There is no physical media.

See the [IBM Spectrum Protect Suite information](#) portal for additional information and documentation about the suite offerings.

Services

Software Services

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an extensive portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

To learn more about IBM Software Services, contact your Lab Services Sales or Delivery Leader.

Software requirements

IBM Spectrum Protect supported devices

See the specific websites for the list of devices that are supported by IBM Spectrum Protect (5725-W98), IBM Spectrum Protect Extended Edition (5725-W99), and IBM Spectrum Protect for Data Retention (5725-X15). Libraries that have more than four drives or more than 48 tape slots require a license for IBM Spectrum Protect Extended Edition.

For IBM Spectrum Protect supported devices for AIX^(R) and Microsoft Windows, go to the [IBM Spectrum Protect Supported Devices for AIX and Windows](#) website.

For IBM Spectrum Protect supported devices for Linux^(R), go to the [IBM Spectrum Protect Supported Devices for Linux](#) website.

Software requirements for IBM Spectrum Protect V8.1 products are available at the individual product websites listed below.

For IBM Spectrum Protect (5725-W98), IBM Spectrum Protect Extended Edition (5725-W99), and IBM Spectrum Protect for Data Retention (5725-X15)¹, go to the [Overview -Tivoli Storage Manager Supported Operating Systems](#) website.

For IBM Spectrum Protect for Databases (5725-X01), go to the [IBM Spectrum Protect for Databases - All Requirements Documents](#) website.

For IBM Spectrum Protect for Enterprise Resource Planning (5725-X03), go to the [IBM Spectrum Protect for Enterprise Resource Planning - All Requirements Documents](#) website.

For IBM Spectrum Protect for Mail (5725-X02), go to the [IBM Spectrum Protect for Mail - All Requirements Documents](#) website.

For IBM Spectrum Protect for Space Management (5725-X04), go to the [IBM Spectrum Protect for Space Management \(HSM\) - All Requirements Documents](#) website.

For IBM Spectrum Protect for SAN (5725-X18), go to the [IBM Spectrum Protect for SAN](#) website.

For IBM Spectrum Protect for Virtual Environments (5725-X00), go to the [IBM Spectrum Protect for Virtual Environments - All Requirements Doc](#) website.

For IBM Spectrum Protect High Speed Data Transfer (5725-Z10), go to [IBM Spectrum Protect High Speed Data Transfer Version 8.1.0](#) website.

For IBM Spectrum Protect for Workstations (5725-X12) and IBM Spectrum Protect for Workstations Starter Edition (5725-X13), go to the [IBM Spectrum Protect for Workstations V8.1.X Hardware and Software Requirements](#) website.

For IBM Spectrum Protect HSM for Windows (5725-X14), go to the [Hardware and software requirements for IBM Spectrum Protect HSM for Windows](#) website.

For IBM Spectrum Protect Snapshot (5725-X22 (PPA) 5608-AB8 (AAS)), go to the [IBM Spectrum Protect Snapshot](#) website.

For technical requirements for IBM Spectrum Protect Suite (5725-X05), IBM Spectrum Protect Suite-Front End (5725-X07), IBM Spectrum Protect Suite Entry (5725-X06), and IBM Spectrum Protect Suite Entry-Front End (5725-X08), see the individual product websites listed above.

¹ IBM Spectrum Protect V8.1, IBM Spectrum Protect Extended Edition V8.1, and IBM Spectrum Protect for Data Retention V8.1 have the same hardware, software, and supported device requirements.

Companion products

Organizations that have a SAN environment might consider purchasing IBM Spectrum Control™ in addition to IBM Spectrum Protect. The organization can benefit from the ability to more fully manage their storage environment, including backup and recovery, management of disk performance, management of the physical network of the SAN, and logical connections between the devices.

The IBM Support Community

The [IBM Support Community](#) is your gateway to technical support tools and resources that are designed to help you save time and simplify support. Support Community tools can help you find answers to questions, download fixes, troubleshoot, automate data collection, submit and track problems, and build skills.

You can also access the [Service requests and PMRs](#) tool for more support.

Planning information

Packaging

This offering is delivered through the internet as an electronic download. There is no physical media.

This offering is available from [IBM Marketplace](#). On IBM Marketplace, you can discover, try, and buy software, hardware, and services from IBM and third-party providers.

This program, when downloaded from a website, contains the applicable IBM license agreement and License Information, if appropriate, which will be presented for acceptance at the time of installation of the program. For future reference, the license and License Information will be stored in a directory such as LICENSE.TXT.

Security, auditability, and control

IBM Spectrum Protect products use the security and auditability features of the operating system software.

The client is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

Products announced as dual-pipe are available for ordering by program number and feature number or by part number. Products can be obtained by part number through [Passport Advantage](#).

For more information, contact your IBM representative or IBM Business Partner.

This product is only available through Passport Advantage. It is not available as shrinkwrap.

These products may only be sold directly by IBM or by IBM Business Partners for Channel Value Rewards.

More information can be found on the [IBM Channel Value Rewards](#) website.

To locate IBM Business Partners for Channel Value Rewards in your geography for a specific Channel Value Rewards portfolio, go to the [Find a Business Partner](#) page.

Passport Advantage client: Media entitlement details

Clients with active maintenance or subscription for the products listed are entitled to receive the corresponding media. This media is Electronic download only.

Pricing examples

IBM Spectrum Protect V8.1.7 Suites include entitlement for IBM Spectrum Protect Plus. IBM Spectrum Protect Plus is measured on a per managed virtual server, or virtual machine (VM), metric when backing up VMs. 1 TB of IBM Spectrum Protect Suite or IBM Spectrum Protect Suite Entry entitles a customer to protect ten VMs with IBM Spectrum Protect Plus. 1 TB of IBM Spectrum Protect Suite - Front End or IBM Spectrum Protect Suite Entry - Front End entitles a customer to protect 15 VMs with IBM Spectrum Protect Plus. When using IBM Spectrum Protect Plus for block-level, incremental backup for applications residing on physical machines, IBM Spectrum Protect Plus is measured per terabyte.

IBM Spectrum Protect Suite - Archive Option terabyte capacity

Entitlements for the IBM Spectrum Protect Suite - Archive Option component apply only to data that meets one of the following two conditions:

1. Archive data within IBM Spectrum Protect that results from running an archive operation, and the data must reside on tape or VTL within the primary storage pool. An archive operation is designated either through the IBM Spectrum Protect user interface itself or through the IBM Spectrum Protect application programming interface (API). Data stored on virtual tape appears to IBM Spectrum Protect as physical tape.
2. Appears only in an IBM Spectrum Protect retention set.

Example 1: Pricing example for retention sets and IBM Spectrum Protect Suite - Archive Option

A client has IBM Spectrum Protect Suite and IBM Spectrum Protect Suite Archive Option. The client has 50 TB of data stored in primary disk storage pools. 10 TB of

the 50 TB represents data that appears only in an IBM Spectrum Protect retention set and not as active backup data. The client must be entitled for:

- 40 TB of IBM Spectrum Protect Suite
- 10 TB of IBM Spectrum Protect Suite Archive Option

Example 2: IBM Spectrum Protect Plus protecting physical database servers and protecting virtual machines

A customer wishes to purchase IBM Spectrum Protect Plus to protect one 400 GB (.4 TB) Microsoft Exchange Server database and one 3 TB MongoDB database. Each database runs on its own physical server and is stored on multiple disk volumes. Transaction log files are consuming additional space. IBM Spectrum Protect Plus is configured to keep seven versions for each database in its repository for recovery purposes. The customer wishes to protect 3.4 TB of front-end database capacity, calculated as 0.4 TB for the Microsoft Exchange Server database, plus 3 TB for the MongoDB database. In addition, the client wishes to protect 150 virtual machines, 30 of them run virtualized Microsoft Exchange Server. The customer will require 4 TB of capacity entitlements for the protection of the physical database servers plus entitlements for 150 virtual machines.

Licensing	Aggregated size of databases on physical servers	Required entitlements for protected VMs	Required license entitlements
IBM Spectrum Protect Plus Capacity (per TB) and IBM Spectrum Protect Plus (per 10 VMs)	3.4 TB	15 packs of 10	4 TB plus 15 packs of 10
IBM Spectrum Protect Suite	3.4 TB	150/10=15 TB	19 TB
IBM Spectrum Protect Suite Entry	3.4 TB	150/10=15 TB	19 TB
IBM Spectrum Protect Suite -- Front End	3.4 TB	150/15=10 TB	14 TB
IBM Spectrum Protect Suite Entry -- Front End	3.4 TB	150/15=10 TB	14 TB

Comments:

- IBM Spectrum Protect Plus standalone is sold per pack of ten VMs for data protection and per terabyte for incremental, block-level backup of applications on physical systems
- 1 TB license of IBM Spectrum Protect Suites entitles the customer to protect ten VMs, regardless of their size
- 1 TB license of IBM Spectrum Protect Suites - Front End entitles the customer to protect 15 VMs, regardless of their size

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available through Passport Advantage.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

Software Maintenance

The IBM Agreement for Acquisition of Software Maintenance (Z125-6011) applies for Subscription and Support (also referred to as Software Maintenance) and does not require client signatures.

Licenses under the IBM International Program License Agreement (IPLA) provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available. Two charges apply: a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

License Information number

The following License Information documents apply to the offerings in this announcement:

Select your language of choice and scroll down to the Charge Metrics section. Follow-on releases, if any, may have updated terms. See the [License Information documents](#) website for more information.

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, see the [IBM Software Support Handbook](#).

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Subscription and Support (also referred to as Software Maintenance) is in effect.

This technical support allows you to obtain assistance (by telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support (Software Maintenance) also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, through an announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

For additional information on the IBM Software Support Lifecycle Policy, see the [IBM Software Support Lifecycle Policy](#) website.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Volume orders (IVO)

No

Passport Advantage applies

Yes, information is available on the [Passport Advantage and Passport Advantage Express](#) website.

Usage restrictions

Yes

This offering is subject to usage restrictions.

Usage is limited to the quantity of Processor Value Units, client devices, and terabytes licensed.

See License Information document for details. These restrictions are current as of the date of announcement. Follow-on releases, if any, may have updated terms. See the [License Information documents](#) website for any new or revised restrictions.

Software Subscription and Support applies

Yes. Software Subscription and Support, also referred to as Software Maintenance, is now included in the Passport Advantage Agreement. Installation and technical support for the products announced in this announcement is provided by the Software Subscription and Support offering of the IBM International Passport Advantage Agreement. This fee service enhances client productivity by providing voice or electronic access into the IBM support organizations.

IBM includes one year of Software Subscription and Support with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance by telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your users.) IBM provides Severity 1 assistance 24 hours a day, every day of the year. For additional details, see the [IBM Software Support Handbook](#). Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under this agreement.

For additional information about the Passport Advantage Agreement, go to the [Passport Advantage and Passport Advantage Express](#) website.

All distributed software licenses include Software Subscription and Support for a period of 12 months from the date of acquisition, providing a streamlined way to acquire IBM software and assure technical support coverage for all licenses.

Extending coverage for a total of three years from date of acquisition, may be elected.

Variable charges apply

No

Educational allowance available

Yes. A 15% education allowance applies to qualified education institution clients.

Statement of good security practices

IT system security involves protecting systems and information through intrusion prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a regulatory compliant, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

Important: IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.

IBM Electronic Services

Electronic Service Agent™ and the IBM Electronic Support web portal are dedicated to providing fast, exceptional support to organizations that have IBM Systems. The IBM Electronic Service Agent tool is a no-additional-charge tool that proactively monitors and reports hardware events, such as system errors, performance issues, and inventory. The Electronic Service Agent tool can help you stay focused on your company's strategic business initiatives, save time, and spend less effort managing day-to-day IT maintenance issues. Servers enabled with this tool can be monitored remotely around the clock by IBM Support, all at no additional cost to you.

Now integrated into the base operating system of AIX V5.3, AIX V6.1, and AIX V7.1, Electronic Service Agent is designed to automatically and electronically report system failures and utilization issues to IBM, which can result in faster problem resolution and increased availability. System configuration and inventory information collected by the Electronic Service Agent tool also can be viewed on the secure Electronic Support web portal, and used to improve problem determination and resolution by you and the IBM support team. To access the tool main menu, simply type `smitty esa_main`, and select Configure Electronic Service Agent. In addition, ESA now includes a powerful web user interface, giving the administrator easy access to status, tool settings, problem information, and filters. For more information and documentation on how to configure and use Electronic Service Agent, go to the [IBM Electronic Service Agent](#) website.

The IBM Electronic Support portal is a single internet entry point that replaces the multiple entry points traditionally used to access IBM internet services and support. This portal enables you to gain easier access to IBM resources for assistance in resolving technical problems. The My Systems and Premium Search functions make it even easier for organizations that are Electronic Service Agent tool-enabled to track system inventory and find pertinent fixes.

Benefits

Increased uptime: The Electronic Service Agent™ tool is designed to enhance the Warranty or Maintenance Agreement by providing faster hardware error reporting and uploading system information to IBM Support. This can translate to less wasted time monitoring the symptoms, diagnosing the error, and manually calling IBM Support to open a problem record. Its 24 x 7 monitoring and reporting mean human intervention is not required to report errors.

Security: The Electronic Service Agent tool is designed to be secure in monitoring, reporting, and storing the data at IBM. The Electronic Service Agent tool is designed to securely transmit either through the internet (HTTPS or VPN) or modem to provide organizations a single point of exit from their site. Communication is one way. Activating Electronic Service Agent does not enable IBM to call into an organization's system.

For additional information, go to the [IBM Electronic Service Agent](#) website.

More accurate reporting: Because system information and error logs are automatically uploaded to the IBM Support Center in conjunction with the service request, you are not required to find and send system information, decreasing the risk of misreported or misdiagnosed errors. Once inside IBM, problem error data is run through a data knowledge management system and knowledge articles are appended to the problem record.

Customized support: Using the IBMid entered during activation, you can view system and support information in the *My Systems and Premium Search* sections of the [IBM Electronic Support](#) page.

My Systems provides valuable reports of installed hardware and software using information collected from the systems by Electronic Service Agent. Reports are available for any system associated with your IBMid. Premium Search combines the function of search and the value of Electronic Service Agent information, providing advanced search of the technical support knowledge base. Using Premium Search and the Electronic Service Agent information that has been collected from your system, you are able to see search results that apply specifically to your systems.

For more information on how to utilize the power of IBM Electronic Services, contact your IBM Systems Services Representative, or go to the [IBM Electronic Support](#) website.

Prices

Business Partner information

If you are an IBM Business Partner acquiring products from IBM, you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBMid and password are required to access the [IBM Passport Advantage](#) website.

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative or IBM Business Partner for Channel Value Rewards. Additional information is also available on the [Passport Advantage and Passport Advantage Express](#) website.

Registered external customers and IBM Business Partners can access IBMLink for charges.

To view pricing information, go to [IBMLink](#).

For software prices, select **Look up IBM standard hardware and software prices (Price) excluding IBM Z^(R) products** under *Prices*. Specify *Price type*, *Search type*, and *Search value*, then click **Search**.

Note: Enter program number in the **Search value**.

You can also contact your local IBM representative or IBM Business Partner for the applicable charges.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified clients to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all client segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or go to the [IBM Global Financing](#) website for more information.

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government clients. Rates are based on a client's credit rating, financing

terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Order now

To order, contact the IBM Digital Sales Center, your local IBM representative, or your IBM Business Partner. To identify your local IBM representative or IBM Business Partner, call 800-IBM-4YOU (426-4968). For more information, contact the IBM Digital Sales Center.

Phone: 800-IBM-CALL (426-2255)
