Overview

IBM[®] Elite Support for Rocket Software Git for z/OS[®] is a support subscription service for Rocket Software Git for z/OS. Git is a widely-used version control system (VCS) that helps development teams to keep track of changes to source code and facilitate group collaboration. The z/OS port of Git supports automatic tagging and conversion of text files between ISO8859-1 (ASCII) and IBM-1047 (EBCDIC) character encodings.

IBM Elite Support for Rocket Software Git for z/OS is a support-only 12-month offering that delivers 24x7 technical support for Rocket Software Git for z/OS. This annual, renewable subscription support offering is priced per Authorized User, providing problem resolution support and maintenance protection. IBM Elite Support for Rocket Software Git for z/OS helps reduce the risk, time to market, and costs that are required to deploy any applications powered by Git. Rocket Software Git for z/OS is available for download, installation, and use at no charge. For more details about Elite Support offerings, see IBM Support.

IBM Elite Support for Rocket Software Git for z/OS is available for order based on the authorized metric.

Rocket Software Git for z/OS is an Open Source software distributed under the GNU General Public License (GPL). Source code is available from [Rocket](#).

No. Special education prices are available through Passport Advantage.

Statement of good security practices

IT system security involves protecting systems and information through intrusion prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed,

or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a regulatory compliant, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

Important: IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.
