Overview

IBM^(R) QRadar^(R) Advisor with WatsonTM

QRadar Advisor with Watson, a cognitive AI app, extends AI powered security analytics to the IBM QRadar platform, helping security analysts rapidly investigate and respond to threats. It leverages Watson for Cyber Security's corpus of knowledge, tapping into both structured and unstructured data (including security websites, blogs, research papers, among others), and correlating with local security incidents. All of this helps to uncover hidden threats and automated insights for faster response and improved decision-making.

Benefits of QRadar Advisor with Watson

- Helps automate routine security operations center tasks
- Can find commonalities across investigations and provides actionable feedback to analysts

IBM QRadar Advisor with Watson- Starter Pack

QRadar Advisor with Watson- Starter Pack, a new component, lets you get started with all the functionality and benefits of QRadar Advisor with Watson for a one-year period, at a lower price. You can use IBM QRadar Advisor with Watson Professional Services to ensure you are tuned and configured quickly and according to best practice usage recommendations.

QRadar Advisor with Watson- Starter Pack is good for only one year and cannot be renewed. At the end of the year, you can continue to experience all of the advantageous you received by purchasing QRadar Advisor with Watson. Additionally, QRadar Advisor with Watson- Starter Pack must be your first QRadar Advisor with Watson purchase. If you have or have had entitlements to any QRadar Advisor with Watson offering, then you are not eligible for QRadar Advisor with Watson- Starter Pack.

Key requirements

- An internet connection and a browser

- On-premises hardware for installing the data gateway-enabling software

Such information is provided subject to the following terms. IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, misappropriated, or misused, or can result in damage to or misuse of your systems, including for use in attacks on others. No IT system or product should be considered completely secure and no single product, service, or security measure can be completely effective in preventing improper use or access. IBM systems, products, and services are designed to be part of a lawful, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

Important: IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.

IBM Support

[IBM Support](#) is your gateway to technical support tools and resources that are designed to help you save time and simplify support. IBM Support can help you find answers to questions, download fixes, troubleshoot, submit and track problem cases, and build skills. Learn and stay informed about the transformation of IBM Support, including new tools, new processes, and new capabilities, by going to the [IBM Support Insider](#).

You can also access the [Service requests and PMRs](#) website for additional support options.

Statement of good security practices

IT system security involves protecting systems and information through intrusion prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a regulatory compliant, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

Important: IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.
