At a glance

IBM API Connect^(R) V10 and IBM^(R) DataPower^(R) Gateway V10 help organizations further accelerate their API-led innovation agendas through the following enhancements:

- API Connect V10 enhancements extend API lifecycle capabilities, including no-code automated API behavior testing and security and management of GraphQL APIs.
- IBM DataPower Gateway V10 enhancements enrich this multiprotocol gateway by extending its event-driven architecture to support the Apache Kafka and Advanced Message Queuing Protocol (AMQP).
- API Connect V10 and IBM DataPower Gateway V10 provide native Red Hat^(R) OpenShift^(R) operator support to streamline the DevOps process.

Overview

As enterprises continue their digital transformation agendas, IT leaders are looking to APIs as a means to interconnect digital solutions across their hybrid and multicloud landscape. This API-led innovation helps organizations accelerate the delivery of new business models and superior client experiences as they create, secure, manage, and socialize APIs across multicloud landscapes.

API Connect V10 and DataPower Gateway V10 can help increase productivity and improve outcomes for teams involved in API-led innovation efforts, including the following roles:

- Developers: Increase productivity by consistently building high-quality APIs
- API product managers: Enhance trust with API consumers through service-level agreement compliance
- API consumers: Accelerate use of data and processes to build new applications
- DevOps: Streamline operations across a multicloud and hybrid cloud landscape
- IT architects: Design and secure responsive solutions with event-based technologies
- Security practitioners: Help ensure high levels of API security with modern standards and policy control

Key requirements

DataPower Gateway V10 requirements include a DataPower Gateway physical appliance or DataPower Gateway Virtual Edition.

For more details about DataPower Gateway V10 and API Connect V10 requirements, see the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability date

May 28, 2020

Description

API Connect V10

API Connect V10 extends support for full-lifecycle API management with the following features that can increase the productivity of organizations that are pursuing API-led innovation:

- **Secure socializing GraphQL endpoints**

Support for GraphQL endpoints enables organizations to register GraphQL schemas in a unified catalog along with their REST and SOAP APIs, including GraphQL impact analysis on backend services. This enables API product managers to assign plans to provide differentiated API product offerings, including protecting backend GraphQL endpoints from being overwhelmed with highly intensive queries. Organizations can then leverage GraphQL in the same trusted manner as their ongoing API management program.
- **Automated API behavior testing**

API Connect V10 automates the creation of test cases based on the semantics of the APIs. This intelligent feature can accelerate teams' ability to build robust quality measurements, leading to faster development cycles and overall greater trust in the API program. After automation, users can leverage a no-code visual composer to further add and extend test cases. While test cases can be run within the context of the user interface, an even greater value is provided through the DevOps-ready plug-in that can be used as part of a continuous integration and delivery (CI/CD) pipeline. Users can leverage these tests in their production environment to monitor the ongoing quality and integrity of their APIs.
- **Enterprise-scale, cloud-native operations**

Enhancements for native OpenShift Value Units/Broker Connection operator support provide a standard mechanism to automate the container lifecycle. This advancement streamlines the DevOps process through benefits like self-healing continuous availability and simplified backup and restore.
- **Extended support for high-resiliency disaster recovery patterns**

Adding to other patterns introduced in prior release, API Connect V10 simplifies dual data center clustering.
- **Security enhancements:**
 - Tracking and auditing of user activity for security and compliance
 - Stronger security to protect APIs through Transport Layer Security (TLS) 1.3
 - Flexibility, without compromising security, for subsystem communication with 1-way TLS and JavaScript Object Notation (JSON) Web Token
 - Enhanced platform security through simple certificate rotation operations
- **Scalability and performance improvements**

Optimizations streamline the management of extremely large API catalogs, of particular benefit to mature enterprises that are scaling out their API programs aggressively. These enhancements can benefit global organizations with extended hybrid topologies and diverse consumer groups.

- New automated migration tooling

Organizations migrating from API Connect V5 can directly upgrade to API Connect V10 by taking advantage of an automated migration utility, which provides flexibility to migrate subsets of the API catalog to reduce risks and costs across multiple project teams. Organizations can also take advantage of new translation and backward-compatibility features, to streamline upgrade into the modern API Gateway.

DataPower Gateway V10

DataPower Gateway V10 extends support for security, control, integration, and optimized access to mission-critical on-premise and cloud workloads through the following enhancements:

- Securing event-based applications

Many organizations are looking at event-based architectures as a means to speed up their business responsiveness. DataPower V10 extends the multiprotocol gateway support by introducing native connectivity to Kafka and AMQP. These features provide a unified means to enforce security policies across microservices and event-based workloads. It also enables organizations to bridge between different protocols, enabling them to accelerate delivery of new solutions without modifying existing applications.

- Improved security, scalability, and performance:

- TLS 1.3 support helps protect an organization's DataPower Gateway investment with performance, security, and privacy enhancements, including hardening of the TLS protocol to remove components that could pose a security vulnerability.
- DataPower Gateways can support TLS 1.2 and TLS 1.3, which enables you to gradually move services to TLS 1.3.

- Enterprise-scale, cloud-native operations

Support for Kubernetes operators provides a standard mechanism to automate the container lifecycle. This advancement streamlines the DevOps process through benefits like self-healing, continuous availability, and simplified backup and restore.

- Red Hat Universal Base Images (UBI)

Organizations that are building solutions leveraging containerized deployments can benefit from a new Docker image built on Red Hat UBI, which provide greater reliability, security, and performance, including readiness with Red Hat OpenShift security policies.

Note : Additional information about API Connect V10, along with other new features, can be found in [IBM Knowledge Center](#).

Accessibility by people with disabilities

Accessibility Compliance Reports (previously known as a VPAT) containing details on accessibility compliance to standards, including the Worldwide Consortium Web Content Accessibility Guidelines, European Standard EN 301 349, and US Section 508, can be found on the [IBM Accessibility Conformance Report Request](#) website.

Services

Software Services

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of the lab-based software services team and the business consulting, project management, and infrastructure expertise of the IBM Global Services team. Also, IBM extends the reach of IBM Software Services through IBM Business Partners to provide an extensive portfolio of capabilities. IBM provides the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

To learn more about IBM Software Services, contact your Lab Services Sales or Delivery Leader.

Technical information

Specified operating environment

Hardware requirements

DataPower Gateway V10

DataPower Gateway V10.0 supports the following DataPower physical and virtual appliances:

Description	Machine type	Model
IBM DataPower Gateway	8436	52X
IBM DataPower Gateway with HSM Card	8436	53X
IBM DataPower Gateway	8441	52X
IBM DataPower Gateway with HSM Card	8441	53X
IBM DataPower Gateway Virtual Edition	5725	T09

For more details about DataPower Gateway V10.0 hardware requirements, see the [System requirements for IBM DataPower Gateways](#) website.

API Connect V10

For API Connect V10 hardware requirements, see the [Software Product Compatibility Reports](#) website.

Software requirements

DataPower Gateway V10

Supported cloud platforms include the following:

- IBM Cloud™
- Amazon Web Services (AWS)
- Microsoft Azure

Note: Support for VMware platforms depends on the VMware vendor's product support lifecycle.

For more details about DataPower Gateway V10 software requirements, see the [System requirements for IBM DataPower Gateways](#) website.

API Connect V10

For API Connect V10 Software requirements, see [Software Product Compatibility Reports](#) website.

IBM Support

[IBM Support](#) is your gateway to technical support tools and resources that are designed to help you save time and simplify support. IBM Support can help you find answers to questions, download fixes, troubleshoot, submit and track problem cases, and build skills. Learn and stay informed about the transformation of IBM Support, including new tools, new processes, and new capabilities, by going to the [IBM Support Insider](#).

Additional support resources are available in the [IBM Appliance Support Guide](#).

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage^(R) Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available through Passport Advantage.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of

Passport Advantage^(R), where applicable, are license only and do not include Software Maintenance.

Agreement for Acquisition of Software Maintenance

Licenses under the IBM International Program License Agreement (IPLA) provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available. Two charges apply: a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

License Information number

The following License Information documents apply to the offerings in this announcement:

IBM DataPower Gateway

Program number	License Information document title	License Information document number
5737-F90	IBM DataPower Gateway	L-RJON-BMJ48K
IBM DataPower Gateway	IBM DataPower Gateway Virtual Edition	L-RJON-BMJ4ED

IBM API Connect

Program number	License Information document title	License Information document number
5725-Z22	IBM API Connect	L-RJON-BNFUQR
5725-Z22	IBM API Connect Enterprise PVU Add-on	L-RJON-BNFUP6
5725-Z22	IBM API Connect Enterprise Monthly	L-RJON-BNFUND
5725-Z22	IBM API Connect Enterprise PVU	L-RJON-BNFUMK

Follow-on releases, if any, may have updated terms. See the [License Information documents](#) website for more information.

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, see the [IBM Support Guide](#).

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available as described below as long as your Software Subscription and Support (also referred to as Software Maintenance) is in effect.

Effective with DataPower Gateway firmware V7.6, DataPower introduces a Continuous Delivery (CD) model to ensure quick response to client needs. DataPower CD will consist of two releases: a CD release approximately once per quarter, and a Long Term Support (LTS) Release every two years. DataPower Gateway LTS releases do not include an extended support period. Only the latest CD release is supported at a given time. LTS releases are for those clients who need enhanced stability and do not wish to upgrade on the CD schedule, while CD releases are intended for those clients who need the latest in DataPower functionality.

This technical support allows you to obtain assistance (by telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support (Software Maintenance) also provides you with access to versions, releases, and updates (CD releases, LTS releases or fixes) of the program. You will be notified, through an announcement letter, of discontinuance of support with six months' notice.

For additional information on the IBM Software Support Lifecycle Policy, see the [IBM Software Support Lifecycle Policy](#) website.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Volume orders (IVO)

No

Passport Advantage applies

Yes, information is available on the [Passport Advantage and Passport Advantage Express[®]](#) website.

Software Subscription and Support applies

Yes. Software Subscription and Support, also referred to as Software Maintenance, is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance by telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, see the [IBM Support Guide](#). Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

Unless specified otherwise in a written agreement with you, IBM does not provide support for third-party products that were not provided by IBM. Ensure that when contacting IBM for covered support, you follow problem determination and other instructions that IBM provides, including in the [IBM Support Guide](#).

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, go to the [Passport Advantage and Passport Advantage Express](#) website.

Statement of good security practices

IT system security involves protecting systems and information through intrusion prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a regulatory compliant, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

Important: IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.

Prices

The prices are unchanged by this announcement.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified clients to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all client segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or go to the [IBM Global Financing](#) website for more information.

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government clients. Rates are based on a client's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Trademarks

IBM Cloud and System i are trademarks of IBM Corporation in the United States, other countries, or both.

IBM API Connect, IBM, DataPower, Passport Advantage, Express, System z, z Systems, IBM Z and IBM z Systems are registered trademarks of IBM Corporation in the United States, other countries, or both.

Red Hat and OpenShift are registered trademarks of Red Hat Inc. in the U.S. and other countries.

The registered trademark Linux## is used pursuant to a sublicense from the Linux Foundation, the exclusive licensee of Linus Torvalds, owner of the mark on a world##wide basis.

Other company, product, and service names may be trademarks or service marks of others.

Terms of use

IBM products and services which are announced and available in your country can be ordered under the applicable standard agreements, terms, conditions, and prices in effect at the time. IBM reserves the right to modify or withdraw this announcement at any time without notice. This announcement is provided for your information only. Additional terms of use are located at
