Overview

CognitiveScale for IBM Cloud Pak^(R) for Data is a third-party ecosystem offering that adds CognitiveScale Cortex trusted AI software to IBM Cloud Pak for Data. These CognitiveScale Cortex additions help businesses leverage machine intelligence to dramatically lower operational costs, transform digital experiences to increase sales and business agility, and reduce model and AI risk exposure. This software is designed to accelerate the AI journey of organizations in healthcare, financial services, and digital commerce industries across on-premises, private cloud, and public cloud environments.

CognitiveScale for IBM Cloud Pak for Data integrates the following CognitiveScale Cortex products with Cloud Pak for Data:

- CognitiveScale Cortex Certifai is an industry-optimized model intelligence platform that automatically monitors, detects, and scores model quality and risks without requiring access to model internals and client IP. It generates the AI Trust Index composite trust score, which measures data and model risks related to performance, data quality, robustness, explainability, fairness, and compliance. Cortex Certifai can be applied to all models including machine learning models, statistical models, business rules, and other predictive models. It automates the management of AI business risk and helps business leaders explain how their automated decision-making systems make inferences and decisions in areas such as public trust, revenue losses, and regulatory backlash and fines.
- CognitiveScale Cortex Fabric is a low-code developer platform for automating development and control of trusted AI applications. Running on Cloud Pak for Data, it provides a visual unified programming and operating environment to help simplify the development, deployment, and management of transparent and trusted enterprise AI systems on cloud.

Key requirements

For details, see the [Software requirements](#) section.

Planned availability date

July 13, 2021

Accessibility by people with disabilities

Accessibility Compliance Reports (previously known as a VPAT) containing details on accessibility compliance to standards, including the Worldwide Consortium Web Content Accessibility Guidelines, European Standard EN 301 349, and US Section 508, can be found on the [IBM^{\(R\)} Accessibility Conformance Report Request](#) website.

Statement of good security practices

IT system security involves protecting systems and information through intrusion prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a regulatory compliant, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

Important: IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.

Prices

For additional information and current prices, contact your local IBM representative or IBM Business Partner.

Business Partner information

If you are an IBM Business Partner acquiring products from IBM, you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBMid and password are required to access the [IBM Passport Advantage](#) or [IBM PartnerWorld^{\(R\)}](#) website.

Passport Advantage
