At a glance

IBM® Integrated Managed Infrastructure Services (IMI) provides monitoring and management services to help manage your cloud and hybrid IT environment more efficiently. It can help you improve availability while keeping your assets within your premises, on a private cloud, on the IBM Cloud™, or on any other clouds.

Overview

IBM Integrated Managed Infrastructure Services provides a suite of customizable services to help monitor and manage your cloud and hybrid IT infrastructure. These remote infrastructure management services can help you reduce downtime, scale operations, and improve application availability while keeping your assets within your premises, on a private cloud, on IBM Cloud, or on other public clouds. IBM service packages are designed for flexibility and can include monitoring or management of servers, storage, network, and middleware, on your traditional environment, your private cloud, or IBM Cloud. You can also include event management, advanced performance and capacity management, and detailed reporting, plus other enhanced capabilities.

Planned availability date

March 26, 2019

Accessibility by people with disabilities

A US Section 508 Accessibility Compliance Report containing details on accessibility compliance can be found on the Product accessibility information website.
