Overview

Effective April 30, 2018, IBM^(R) will withdraw support for the following programs licensed under the IBM International Program License Agreement:

Program number	Program release name	VRM	Withdrawal from support date
5724-J08	IBM WebSphere ^(R) Application Server	7.0.x	April 30, 2018
5724-J08	IBM WebSphere Application Server - Web 2.0 Feature Pack	7.0.0	April 30, 2018
5724-J08	IBM WebSphere Application Server - SCA Feature Pack	7.0.0	April 30, 2018
5724-J08	IBM WebSphere Application Server - CEA Feature Pack	7.0.0	April 30, 2018
5724-J08	IBM WebSphere Application Server - XML Feature Pack	7.0.0	April 30, 2018
5724-J08	IBM WebSphere Application Server - JPA and OGSi Feature Pack	7.0.0	April 30, 2018
5724-J08	IBM WebSphere Application Server - Modern Batch Feature Pack	7.0.0	April 30, 2018
5724-J08	IBM WebSphere Application Server Feature Pack for Dynamic Scripting	1.1.1	April 30, 2018
5724-I63	IBM WebSphere Application Server -Express ^(R)	7.0.x	April 30, 2018
5724-H88	IBM WebSphere Application Server Network Deployment	7.0.x	April 30, 2018

Program number	Program release name	VRM	Withdrawal from support date
5724-H89	IBM WebSphere Application Server for Developers	7.0.x	April 30, 2018
5725-F49	IBM WebSphere Application Server - Tools Edition	7.0.x	April 30, 2018
5725-F50	IBM WebSphere Application Server for Developers - Tools Edition for Eclipse	7.0.x	April 30, 2018
5725-F51	IBM WebSphere Application Server Network Deployment - Tools Edition	7.0.x	April 30, 2018
5724-IHS	IBM WebSphere IHS Special Bid pSeries	7.0.x	April 30, 2018
5724-J08	IBM WebSphere Application Server	8.0.x	April 30, 2018
5724-J08	WebSphere Application Server - Web 2.0 Feature Pack	8.0.0	April 30, 2018
5724-J08	IBM WebSphere Application Server Feature Pack for Dynamic Scripting	1.1.1	April 30, 2018
5724-I63	IBM WebSphere Application Server -Express	8.0.x	April 30, 2018
5724-H88	IBM WebSphere Application Server Network Deployment	8.0.x	April 30, 2018
5724-H89	IBM WebSphere Application Server for Developers	8.0.x	April 30, 2018
5724-F49	IBM WebSphere Application Server - Tools Edition	8.0.x	April 30, 2018
5725-F50	IBM WebSphere Application Server for Developers - Tools Edition for Eclipse	8.0.x	April 30, 2018
5725-F51	IBM WebSphere Application Server Network Deployment - Tools Edition	8.0.x	April 30, 2018
5724-IHS	IBM WebSphere IHS Special Bid pSeries	8.0.x	April 30, 2018
5725-C92	IBM WebSphere Virtual Enterprise	7.0.x	April 30, 2018
5725-C93	IBM WebSphere Extended Deployment Compute Grid	8.0.x	April 30, 2018

WebSphere Application Server V8.5 Java™ support

IBM highly recommends that you move to WebSphere Application Server for V8.5 or WebSphere Application Server for V9.0 and the latest Java SE version (Java SE 8) due to potential security risks on earlier releases of WebSphere Application Server and Java.

WebSphere Application Server for V8.5 provides the option to use Java SE 6, Java SE 7, or Java SE 8. WebSphere Application Server includes Java and during the life-cycle of WebSphere Application Server those packaged versions of Java may go out of support by Oracle. Once a Java SE release is no longer supported by Oracle then IBM will not be able to provide any code fixes for that specific Java release.

Security risks can come in the form of newly identified exposures that impact older versions of Java, and also updates from browser vendors that remove support for security standards that are no longer considered secure, such as SHA1. Current versions of WebSphere Application Server support multiple versions of Java SE. New releases of Java are added as they become available to enable you to stay current and reduce the risk of security exposures.

See [Oracle support](#) for details of when Oracle will discontinue support for specific Java versions.

If you are using WebSphere Application Server V8.5 with Java SE 6, then there will no longer be support for the Java SE 6 version after April 2018. Similarly, for users of WebSphere Application Server V8.5 with Java SE 7 or Java SE 7.1, support for the Java SE 7.x versions will be discontinued after July 2022.

WebSphere Application Server Liberty has a single support stream for all product versions. Support for Java SE 6 with Liberty will end in September 2017 to allow the Liberty code and included open source packages to move forward. Support for the Java SE 7.x versions will be discontinued after September 2019.

Migration planning

Information on migration planning for WebSphere Application Server and also information on best practices, offers, and incentives is available in the [Knowledge Collection](#).

Additional migration guidance is provided in a [WebSphere Application Server flowchart](#) to help you decide which edition of the application server (WebSphere Application Server traditional or WebSphere Liberty) and platform (Docker, WebSphere for Bluemix^(R), or local data center) best meets your needs.

Operating environment support changes

Effective the third quarter of 2018, WebSphere Liberty will only support the following platforms and operating systems as "Other Configurations".

- Red Hat Enterprise Linux (RHEL) - Big Endian on Power^(R)
- SUSE Linux Enterprise Server (SLES) - Big Endian on Power
- SUSE Linux Enterprise Server (SLES) - Little Endian on Power
- SUSE Linux Enterprise Server (SLES) and SUSE Linux Enterprise Desktop (SLED) on x86
- Solaris on x86 and Sparc
- HP-UX

This change in supported platforms and operating environments is limited to WebSphere Liberty and does not impact WebSphere Application Server traditional.

WebSphere Application Server traditional will continue to support these platforms without any changes.

WebSphere Application Server Support Policy

WebSphere Application Server has changed to a continuous delivery support model.

IBM recently announced a new software support policy lifecycle, the [continuous delivery support model](#), for products that are making new functions available on a frequent basis. WebSphere Application Server is changing to this new support model in a way that combines the existing minimum '5 plus 3' years of support with the flexibility of the continuous delivery support model. The new policy will apply to all releases and editions of WebSphere Application Server, with the following additional provisions.

WebSphere Application Server will continue to provide a minimum of five years of standard (defect and non-defect) product technical support from the date the product release was made generally available by IBM, with the option to get support extensions for at least an additional three years following the product's End of Support (EoS) date for an extra charge set by IBM. The continuous delivery of new function in fix packs, or in the case of Liberty, as optionally installable new features, is extending the time between major releases of the product, so concurrent support for multiple product releases is not guaranteed.

In general, fixes will be provided in Continuous Delivery (CD) updates (fix packs). Recommended fixes may also be provided as interim fixes to be applied to the current fix pack level, before the next fix pack is available. When requested, interim fixes may be provided, at IBM's discretion, to be applied on fix packs that were made generally available up to two years before the date that the fix is created, if both of the following circumstances apply:

1. The fix resolves a problem that impacts ongoing production or a committed production start date.
2. There is no acceptable workaround for the problem.

The creation of test fixes will be limited to problems that have not been reproduced by IBM support. If the product runs on an operating system release that is no longer supported, or with a corequisite or prerequisite product that is no longer supported, IBM technical support may be limited to defects that can be replicated on currently supported environments. In this situation, the existing 'other configurations' policy continues to apply, and IBM will apply reasonable effort to support your configuration. The product will not be tested with corequisite or prerequisite products that are no longer supported

For more information on the continuous delivery support model, see Software Announcement [216-269](#), dated May 24, 2016.

Withdrawn programs

Effective on the dates shown, IBM will withdraw from marketing part numbers from the following programs licensed under the IBM International Program License Agreement:

Program number	Program release name	VRM	Withdrawal from marketing date
5724-J08	IBM WebSphere Application Server		
BAOPUML	IBM WebSphere Application Server V7.0 for AIX on PowerPC ^(R) 32-bit, Multilingual CD ROM Media Pack	7.0.0	December 16, 2016

Program number	Program release name	VRM	Withdrawal from marketing date
