

# Accelerating security

Winning the race to vehicle integrity and data privacy

A comprehensive approach to security is required to address the needs of today's connected vehicles.

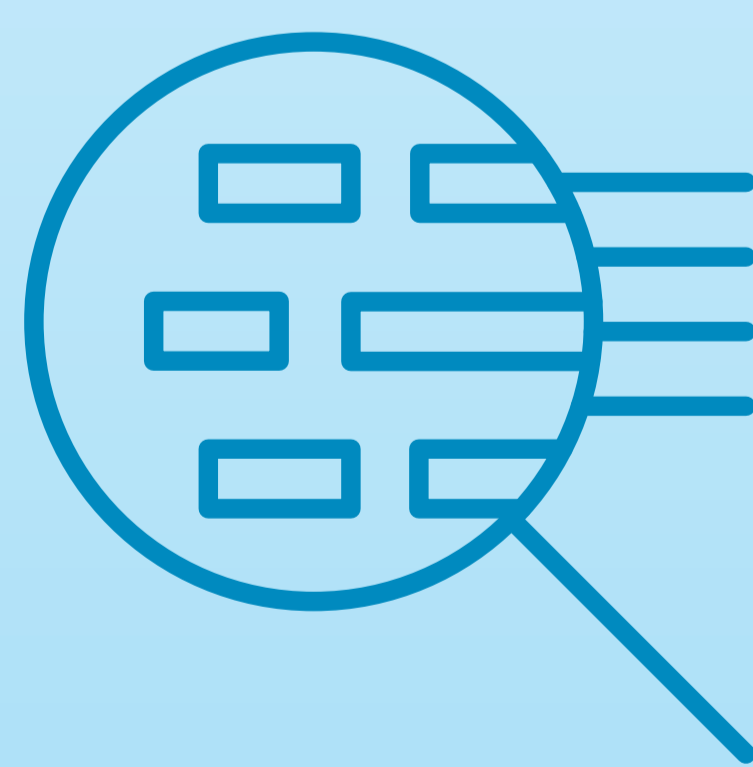

## The components of the “Drive with confidence” phase

### ▶ Prevent exploits

- Authenticating entities
- Managing access
- Encrypting data

### ▶ Detect suspicious behavior

- Uncovering anomalies
- Applying security analytics and intelligence
- Controlling versions

### ▶ Respond by recovering gracefully and safely

- Managing vulnerabilities
- Implementing a Vehicle Security Operations Center
- Improving continuously
