Companies, both large and small, are looking for ways to simplify operations and reduce IT costs while meeting the demands of their business. A critical factor in minimizing cost and maximizing value is ensuring that your IT environment exploits the latest technologies and solutions.

IBM offers a no-charge IT value and cost assessment to determine the most effective technical and economical solution for your business. Leverage this assessment to examine solution alternatives, operational efficiencies, and return on investment for your organization.

**What information is examined in your IT value and cost assessment?**

The assessment evaluates technical and operational differences between your existing environment and alternative solutions:

- IT operating costs, capital expenditures, migration, server upgrades, maintenance
- Business values (KPIs) and qualities of service (SLAs, security, resiliency, serviceability)
- Workload consolidation, server utilization and performance efficiencies
- Return on investment and payback period
- Total cost savings over multiple years

**Get started**

Send a request to the IBM IT Economics team at IT.Economics@us.ibm.com or ask your IBM Client Representative or IBM Business Partner.

An IT Economics consultant will provide a two hour on-site workshop to learn about your IT strategy, capture objectives for the assessment, gather information about your IT environment, and share best practices. Your consultant will develop a business case which is delivered in two to four weeks. Your assessment will provide:

- Detailed analysis based on your customized scenario
- Recommendations to reduce IT spend and to achieve technical and business requirements

**IT Value and Cost Assessment**

No-charge, on-site IT assessments available
