The Weather Company data package: Lifestyle indices

Help your viewers make more informed daily decisions
Weather data can impact a person’s behavior in many situations. The Lifestyle Indices data package from The Weather Company, an IBM Business, helps organizations use weather events and their biological interactions to better serve customers, patients, members, etc.

Make more informed lifestyle decisions based on our forecasts

Staying abreast of your clients’ needs can help keep you top of mind when they need advice on daily activities. Give them the best forecasting possible with The Weather Company’s Lifestyle Indices data package to help ensure that they are ready for virtually anything.

This package includes access to the following features:

- **Air quality historical, observations and forecast** – Data from multiple air quality sensor networks including historical, daily observations and forecast air quality; includes specific pollutant indexes and counts
- **Pollen observations** – Data observations from allergists, includes pollen count and indexes for tree, grass, weed and mold
- **Flu outbreak observations** – Flu activity levels distributed weekly during flu season via the CDC
- **Tides** – Marine tide predictions for the next 30 days for coastal locations
- **Aches and pains** – The weather’s influence on an individual’s potential to feel aches and pains
- **Breathing** – Indicates weather’s influence on an individual’s ability to breath normally
- **Dry skin, frizz and static electricity** – Indicates the likelihood that a person may experience these conditions based on weather
- **Frost potential** – Indicates the likelihood of frost
- **Heating and cooling** – Describes the amount of heating/cooling required to maintain a comfortable indoor temperature based on weather conditions
- **Golf, leisure travel, running and skiing** – Indicates the weather conditions for these activities
- **Mosquito activity** – Indicates the weather influence on mosquito activity and proliferation

Other data packages offered by The Weather Company include Core Weather, Enhanced Current Conditions, Enhanced Forecast, and Severe Weather.

Specific data availability can differ by geography and region.
About The Weather Company, an IBM Business
The Weather Company, an IBM Business, helps people make informed decisions and take action in the face of weather. The company offers the most accurate forecasts globally with personalized and actionable weather data and insights to millions of consumers, as well as thousands of marketers and businesses via Weather’s API, its business solutions division, and its own digital products from The Weather Channel (weather.com) and Weather Underground (wunderground.com).

The company delivers around 25 billion forecasts daily. It’s products include the world’s most downloaded weather app, a network of 250,000 personal weather stations, a top-20 U.S. website, one of the world’s largest IoT data platforms, and industry-leading business solutions.

Weather Means Business™. The world’s biggest brands in aviation, energy, insurance, media, and government rely on The Weather Company for data, technology platforms and services to help improve decision-making and respond to weather’s impact on business.

Statement of Good Security Practices:
IT system security involves protecting systems and information through prevention, detection and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, misappropriated or misused or can result in damage to or misuse of your systems, including for use in attacks on others. No IT system or product should be considered completely secure and no single product, service or security measure can be completely effective in preventing improper use or access. IBM systems, products and services are designed to be part of a lawful, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products or services to be most effective. IBM does not warrant that any systems, product or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.
