

In this unprecedented time of Covid-19, the operations of the semiconductors Assembly and Test at IBM in Bromont have never stopped. Being of a high priority service for our society, our manufacturing team have maintained the operations and have delivered all of our client's orders with no impact on our engagements. Well supported by their colleagues working from home to maintain a safe place to work and provide added value to our customers, IBM shows another testimony of its strength, reliability and unconditional engagement to find solutions facing any kind of issues in order to satisfy our customers. A HUGE THANKS to our team!

This unique situation certainly put a lot of stress on any supply chain and we are all, more then ever, sensitized about its design and the location where we provide our essential material to support our operations. IBM in Bromont is a unique semiconductor assembly and test facility in North America with over 850K sq ft of manufacturing floor equipped to assemble and test advanced solutions for our clients. There has never been a better time to take the opportunity to consider us as a solution and a strategic addition to your supply chain. The IBM team in Bromont is ready to take on any challenge thanks to its experience and our state of the art manufacturing facility, here in North America, to support your needs.

Take a moment and reach out to us at assembly@ca.ibm.com
Chances are, you won't regret!

Until then, be resilient, stay safe and healthy and THINK! Think about what your supply chain could be...
