

IBM Smart Enterprise for Oracle Cloud Platform

Delivering enterprise quality and maximizing business agility for mid-market

This industry tailored platform is designed for cost-effective, rapid implementation of Oracle Cloud Applications.

Through the platform, mid-market enterprises can realize the benefits of Oracle Cloud Applications faster and without the need for traditional long running, complex and expensive programs.

The platform delivers on industry specific leading practices for Finance, Procurement and Human Resources. Each process within those functions mobilizes “extreme automation” allowing mid-market enterprises to achieve maximum business value.

Five pre-built SMART platforms:

HCM, Helpdesk, Recruit and Learn

Tailored to customers looking to transform critical HR functions. Enabling new employee experiences through recruitment, self-service and learning via Oracle Cloud Applications.

HCM, Helpdesk, Learn, Talent, Reward

Tailored to customers who want to deliver a richer and expanded suite of HR processes through Oracle Cloud Applications. Building on HR, Recruitment and Learning to also include Talent and Reward.

HR, Payroll, Finance and Procurement

Tailored to clients looking for an end-to-end integrated Cloud platform covering core processes for HR, Talent, Payroll, Finance and Procurement.

HCM, Helpdesk, Talent, Reward, Payroll

Tailored to customers who are looking to transform HR operations for core HR, Talent, Learn, Reward and Benefits, Time and Payroll via Oracle Cloud Applications.

Finance and Procurement

Tailored to customers who are looking to retain existing HR capabilities, but transform finance and procurement operations via Oracle Cloud Applications.

Delivering industry differentiation

The platform is pre-built and can be deployed at speed, it is centered around industry tailored solutions which address key industry pain points.

Banking and
Financial Markets

Insurance

Professional
Services

Pharma

Industrial

Government

Telco

Media

Energy
and Utilities

Retail

Transport

Construction
and Engineering

Attaining competitive edge through “extreme” automation

The platform delivers greater efficiency, insight and improved employee experience through automation and Artificial Intelligence (AI). This creates an “extreme automation” culture within your business processes and applications.

Through the platform, mid-market enterprises can more easily and rapidly:

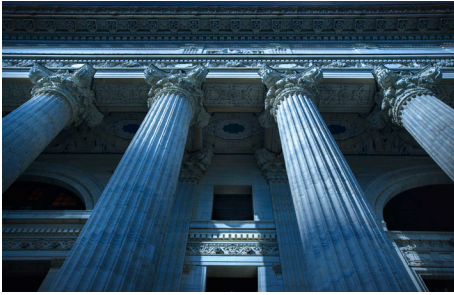

- Scale up
- Reach new markets
- Improve recruitment and retention
- Deliver greater customer satisfaction

Examples of “extreme automation” solutions:

- Finance: IBM Touchless Period Close
 - Built for Oracle Cloud Enterprise Resource Planning (ERP) and Enterprise Performance Management (EPM), this automation reduces time to close by up to 70%
- Human Resources: IBM Digital Interview Assistant
 - Built for Oracle Cloud HCM, this automation reduces time to hire by up to 40%

Client case studies

Major Public Heritage Project

Re-making history with the cloud

With the Oracle Cloud Applications in place, the organization now has the tools it needs to manage its day-to-day business as it scales up its team and begins onboarding suppliers to support the design and delivery of dozens of vital renovation projects.

By adopting industry-standard solutions for finance, procurement, HR and recruitment, the organization now has a single set of clear and well-documented business processes, which will help it stay smart, efficient and scalable as it grows. Meanwhile, the underlying Oracle Cloud Platform will evolve to keep pace with regulatory requirements and provide richer functionality, allowing the organization to focus on business-level concerns, not IT infrastructure.

Government Facilities Services Limited (GFSL)

Secures financial controls at Her Majesty's Prisons in just three months with Oracle and IBM Services

When the UK Government took charge of the southern half of English prisons facilities management, it needed business capabilities as fast as possible. A newly formed GovCo (Gov Facility Services Ltd) worked with IBM Services™ to establish Oracle Global HR, Financials and Procurement Cloud within three months, and Oracle Payroll Cloud within six.
