

Optimize your infrastructure for the cognitive era with **IBM DS8880 family** and **IBM z13s systems**.

IBM z13s systems:

8X

Serve up more data for exponential analytic transaction volumes with **8x more memory**, enhanced cache and I/O bandwidth

Support transaction growth in the mobile world with more than **2X capacity**, 16Gb links, intelligent I/O and security enhancements

2X

24x7

Enable the cloud with enterprise grade Linux solution, open standards, **24x7 availability** and improved recovery time

IBM DS8884:

2X

2x performance improvement per enclosure on real-time analytics, cognitive computing and traditional IO intensive workloads

Over 3 times more **flash capacity** for storage consolidation and high-data-volume workloads

3X

24x7

24x7 access to **data and applications** on high demand transaction processing workloads where data integrity is critical

Now extended to enterprises of all sizes with a new entry point solution with IBM **DS8880 family** and **z13s**.

IBM z Systems and **DS8880** Data Systems together are designed to deliver > 99.999% uptime.

Transform **efficiency** and **reduce** complexity and cost with a **flexible, optimized** end to end solution.

Accelerate transactions, **Speed** analytics, **Enable** cloud, **Minimize** downtime, **Secure** data.
