

# Remote Session Management at Enterprise Scale

## Monitor, record and control privileged sessions

As IT groups scale their efforts across larger networks, new cloud services, various connection protocols, numerous privileged users, different business groups and customer environments, they need to closely monitor privileged accounts across sessions. Teams must navigate complex networks, cloud services, and user needs. With multiple sessions active at once, using different connection protocols and a variety of privileged accounts, managing and securing them is a challenge. IBM Security Verify Privilege Remote is an advanced remote connection management solution that provides one place to manage and interact with multiple remote sessions.

### Maximize Productivity

- Support use of specific protocols, tools and user interfaces for multiple sessions.
- Launch new sessions in a separate tab for better visibility.
- Quickly switch between sessions.
- Available for Windows and MacOS

### Secure Credentials

- Inject credentials automatically into sessions from IBM Security Verify Privilege Vault.
- Minimize privilege escalation and third-party privileged account misuse.

### Highlights

---

- Improve oversight over all privileged sessions and users
  - Unburden IT teams with centralized control of sessions to reduce confusion and enhance usability
  - Scale your PAM to gain visibility across hundreds of different connections in a single location
-

- Reduce improper access due to administrative errors.

### **Centralize Control**

- Tight integration with Verify Privilege Vault provides secure access to privileged credentials.
- Support for workflow actions are accessible in a single location.
- Improve accountability and oversight over privileged users.

### **Monitor and Audit**

- Capture every action taken in your audit log to prove regulatory compliance.
- Enable session recording.
- Meet regulations including SOX, HIPAA, ICS CERT, GLBA, PCI DSS, FDCC, FISMA, among others.

Verify Privilege Remote scales across hundreds of connections through a single interface to improve productivity, strengthen security and tighten compliance

Verify Privilege Remote provides a unified environment to manage and interact with multiple remote sessions for both Remote Desktop Protocol (RDP) and SSH. Credentials, session recording, multifactor authentication and secrets access workflows can now be accessed in a single location and includes:

- Single interface with multiple remote sessions
- Standard RDP and SSH controls
- Session management feature for Verify Privilege Vault and ad-hoc sessions
- Credentials from secrets and support for workflow actions
- Multiple authentication methods
- Connections to multiple environments
- Search to look for secrets or connection names

## **Why Verify Privilege Remote**

Rapid deployment to start. Elastic scalability to grow. Easy access to privileged credentials from the Verify Privilege Vault on-premises or in the cloud. Monitor, record and control simultaneous remote sessions - from a single interface.

Key features:

- **Streamline control over sessions:** Verify Privilege Remote saves you time and lowers your privileged user risk
- **Remote access:** Launch and configure sessions across multiple environments
- **Session management:** Automatically inject credentials into sessions
- **Centralized control:** Access a single interface to manage and interact with sessions.
- **Session recording:** Create an end to end record of privileged user access
- **Tracking and auditing:** Provide an audit trail to demonstrate compliance

## Why IBM?

Of the dozens of vendors that offer IAM solutions and services, only IBM infuses deep identity context and expertise into your program, empowering you to give the right people the right access at the right time. That's why IBM is also the only vendor that leads in identity governance and administration, access management, privileged access management and professional and managed services. With the industry's broadest portfolio of IAM solutions and more than 7,000+ experts focused on supporting your transformation, we can help tackle your toughest identity challenges.
