

# Stabilize nurse staffing without compromising care

## Challenge:

Healthcare systems are overwhelmed, and staff are burned out due to the remarkably high demands during these unprecedented times. Lack of enterprise-wide visibility and flexibility to adapt staffing for the dynamic changing environment results in poor resource utilization, which can compromise care.

## Approach:

Working with your team, Simpler will rapidly implement a **visual clinical staffing process** across your organization to improve resource allocation and utilization. Our approach engages nursing and key leaders to break down silos and optimize resources throughout the organization.

## Results:

↓	Reduced use of nurse travelers
↓	Reduced overtime
↑	Improved throughput
↑	Improved labor utilization
