

IBM Blueworks Live

Optimize your business processes

What is IBM Blueworks Live?

An intuitive, cloud-based business process modeling tool that generates industry-standard BPMN 2.0 layouts, documentation and output allowing you to:

Simplify business process modeling

Quickly build processes in a straightforward cloud-based interface designed for both IT and business users

Improve process efficiency and accuracy

A central process repository eliminates version control and consistency issues by providing users real-time access to process workflows

Enhance cross-team collaboration

A shared team workspace engages all business process owners, encouraging cross-team participation and continuous process improvement

Key features

Centralized process repository

Eliminate version control and consistency issues. Receive notifications when colleagues make changes to your projects

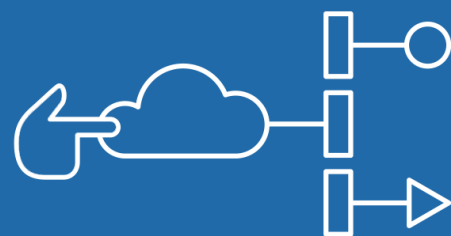

Automatic layout of BPMN 2.0 compliant process diagrams

Follows accepted modeling standards without forcing users to become experts in the standards

Simultaneous collaboration

Integrated real-time communication enables users to post comments, share ideas and message one another, encouraging cross-team participation

Nothing to download or install

Cloud-based software solution allows you to model your business processes from anywhere via web browser
