IBM X-Force Exchange

IBM® X-Force® Exchange is a **cloud-based threat intelligence sharing platform**. It enables you to research the latest global security threats, aggregate actionable intelligence and collaborate with your peers. IBM X-Force Exchange can provide increased threat visibility, improved incident investigation and accelerated response.

IBM X-Force Exchange helps you:

Quickly research and share information about threats by exploiting the depth and breadth of IBM X-Force research.

Capitalize on a simple, powerful user experience to make threat research and sharing more efficient.

Incorporate intelligence with security operations and near real-time decision making.

Collaborate with your industry peers to improve threat management.

Strategic and tactical uses of threat intelligence

IBM X-Force Exchange helps you better respond to attacks by:

Using threat intelligence feeds as context for enriching alerts and other security

Validating and correlating threat intelligence; enriching strategic threat intelligence by linking to indicators and internal threat intelligence

**Connecting IT resources** based on threat intelligence feeds; fraud risk assessment

IBM X-Force Exchange—quickly gain access to human and machine-generated threat intelligence sourced from:[2]

Real-time global intelligence from over **270 million** endpoints

Web threat monitoring of more than **25 billion** web pages and images

Intelligence from **8 million** spam and phishing attacks

Multiple third party sources of intelligence

65% of enterprises use external threat intelligence source as part of their security analytics activities[3]

51% of CISOs believe it's imperative to share threat intelligence with industry peers[4]

In 2014, a record number of **9,200** new vulnerabilities were recorded.[5]
