

## Achieve CalAIM Objectives on Time

CalAIM Implementation System for ILOS-ECM-PHM-LTC-Tech and more

### Vision and Strategy

With a clear understanding of the CalAIM mandate and goals, we help you create the structure and support to align your organization at all levels.

### Business Process (Re)Design

We engage and train your team to systematically make breakthrough improvements across functions, departments, and processes to support CalAIM.

### Digital Daily Management System

Implement a virtual DDMS to provide functional teams clarity around key performance trends and operational metrics for transparency and accountability.

### Governance

We provide a structured Leadership Management System framework to ensure oversight and quick remediation of problems and issues that may hinder success.

2021 Simpler Consulting

### Challenge

CalAIM is the most significant change to impact Medi-Cal in several decades. It requires organizations to optimize operations while maximizing clinical outcomes and reducing medical costs.

### Approach

Simpler partners with you to support your team in creating an organizational wide-implementation approach for transformational programs such as CalAIM.

Our structured approach to CalAIM enables real-time performance tracking and project monitoring to further accountability and help you comply with CalAIM mandates. We engage and enable your entire team to operationalize and sustain ongoing CalAIM outcomes.

We are your passionate, trusted advisors who deeply understand the payer market as well as the challenges of implementing CalAIM.

### Results

Our experienced team has guided LHPC members with CalAIM implementation by:

- ✓ Developing a population health risk stratification tool
- ✓ Devising an integrated care management model to support ECM
- ✓ Creating a housing deployment plan

We will use our structured approach, along with our payer operations experience to help you align and deploy your strategy and to achieve CalAIM program goals.
