

# Engineering and construction digital supply chains

How leaders are increasing visibility and insight

A digital supply chain can synchronize the multi-enterprise supply chain network while improving visibility and leveraging asset availability.

It includes three capabilities:

Synchronized schedules

Value chain visibility

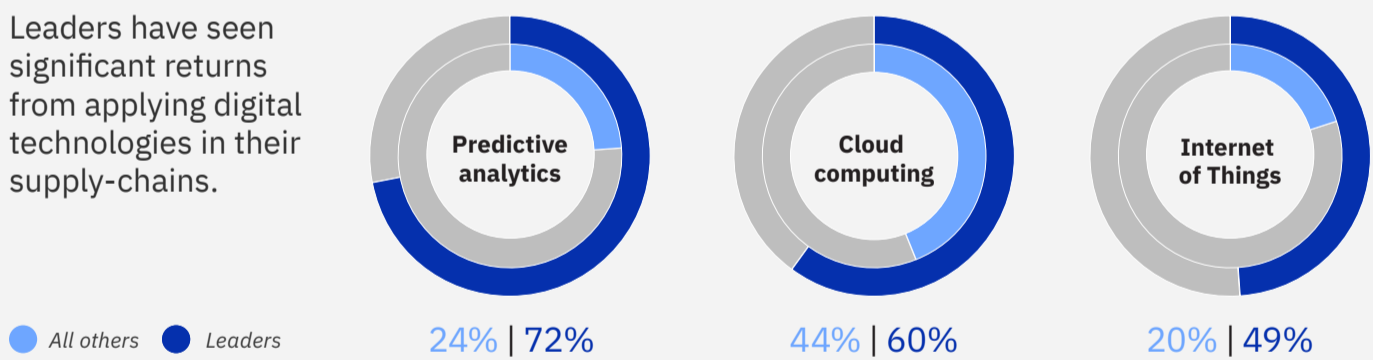

Intelligent assets

Engineering and construction leaders view digital investment as important across the supply chain activities.

Leaders have seen significant returns from applying digital technologies in their supply-chains.

A well-constructed program for reinventing your supply chain requires uncovering new intelligence, creating supply chain processes that can think and readying your digital skillset.
