

# Watson for Oncology and breast cancer treatment recommendations: agreement with an expert multidisciplinary tumor board.

Somashekhar S, et al. *Ann Oncol.* 2018;29(2):418-423.

**93%**

Watson for Oncology demonstrated 93% concordance for breast cancer rates (N = 638)

*“This study demonstrates that the AI clinical decision-support system WFO may be a helpful tool for breast cancer treatment decision making, especially at centers where expert breast cancer resources are limited.”*
