PROUCT ID - Unique identifier for each product.
PRODUCT PRICE ID - An Item ID will have multiple Price IDs when needed for various packages. For example, the Item ID for a hard drive (1TB SATA) has multiple Price IDs since there is unique hard drive pricing based on the chassis size of the server on which it is provisioned

PRODUCT PRICE ID - An Item ID will have multiple Price IDs when needed for various packages. For example, the Item ID for a hard drivin (ITB SATA) has multiple Price IDs since there is unique hard drive pricing based on the chassis size of the server on which it is provisioned When ordering off the website, the system will select the right Price ID based on the configuration being ordered. Price IDs are unique in the sense that they are the lowest level of granularity within the catalog A Price ID can have both monthly and hourly rates because the underlying item is available in both monthly and hourly packages. The package determines whether the monthly or hourly rate is applie When Monthly Recurring fee and Hourly Rate appear against the same Price ID, only one or the other will apply based on the product configuration selected. Software items with \$0 price under all column have free licenses. Hardware items with \$0 price are part of bundled offering Network products with zeros in all pricing columns are part of product bundles.
