Ease of Use

97%

90% category average

"I like it because it is low code and you can build a bot quickly if you have the knowledge and it is ready to use within a few days of deploying it. I also like how comfortable and easy it is to use and drag-drop, and develop. IBM speeds up your workflow and lowers your total cost saving a lot of time."

- G2 Reviewer ★★★★★

Likely to Recommend

A donut chart showing 94% completion. The chart is a circle with a blue and purple gradient, with 94% of the circle filled. The number "94%" is in the center.

of users rated us
4 or 5 stars

"We like the way to develop bots without using any code. It only takes a few clicks to create an automation application, and it runs the whole process by itself. Staff can focus on what really matters instead of paying attention to a bot. The learning curve for simple applications is very short."
