

## Technical Bulletin

### CL/GATEWAY™ for IMS Version 147

This bulletin contains instructions for activating CL/GATEWAY for IMS, Version 147.

#### Important

Before you install this tape, Candle recommends that you contact Candle Support Services at (800) 328-1811 for the latest preventive maintenance information. Ask for **V147 PSP bucket**.

---

## Activating CL/GATEWAY for IMS

When you install the product tape, you have access to CL/SUPERSESSION and CL/GATEWAY for MVS. The CL/GATEWAY for IMS component is disabled.

Customers who are licensed for CL/GATEWAY for IMS can activate that component by performing the following steps after completing the installation:

1. Create a member called KLGINIMS in your *&rhilev*.RLSPARM dataset, where *&rhilev* is the high-level qualifier that you defined for your runtime libraries during installation.
2. Add a line to KLGINIMS that contains the command START IMSGATE.

**Result:** When you start the product after performing these steps, CL/GATEWAY for IMS is enabled.

### Support

If you have any questions, please contact Candle Support Services at (800) 328-1811 or fax (310)582-4204.
