

IBM® Storwize® V5020 is a flexible storage solution that offers extraordinary scalability from the smallest to the largest system without disruption. Built with IBM Spectrum Virtualize™ software, it can help you lower capital and operational storage costs with heterogeneous data services. Storwize V5020 is an easily customizable and upgradeable solution for better investment protection, improved performance, and enhanced efficiency.

Key features

- High availability and enhanced security
- IBM Easy Tier®, advanced copy services
- Integration of your existing storage environment – online data migration from old disk system to new V5020
- Graphical User Interface (GUI)
- Gain storage visibility, insight and control – **IBM Storage Insight**
- Data encryption – **GDPR ready!**
- scalability **up to 392 disk drives**
- redundant, A-A controllers
- 16GB cache, up to 32 GB
- **6x12Gb SAS & 4x 1Gb iSCSI host ports**
- **10,2 TB usable capacity** (900GB10krpm)

The Storwize family of products from IBM, a recognized leader in the storage industry, is known for providing efficiency and high-performance storage for almost any type of workload. IBM storage offerings customized for small, mid-sized and large organizations are designed to deliver sophisticated capabilities that help control costs for growing businesses.
