

DON'T GO INTO THE WOODS ALONE

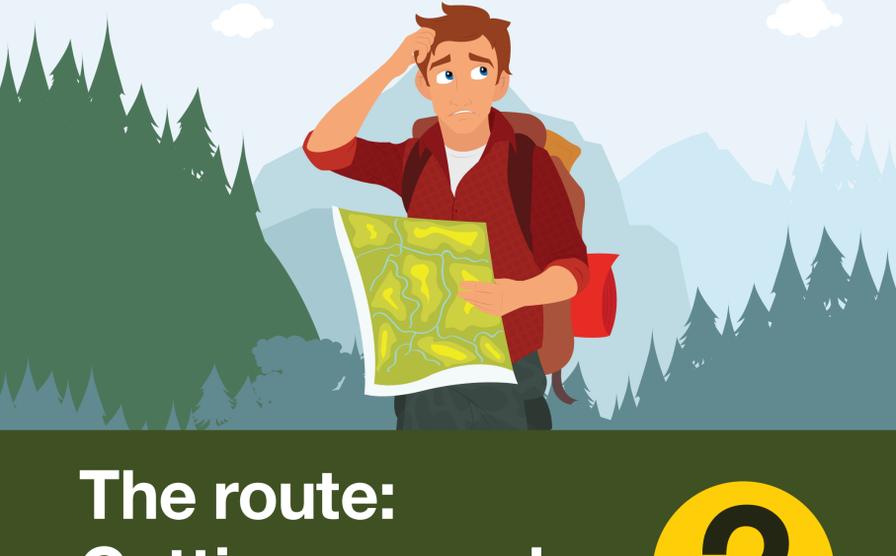

You wouldn't set out on a hiking expedition without preparing. Building an effective identity governance and administration (IGA) program for your business is no different. Take IBM along.

1

The plan: Why, where and how you're going.

Ensure that your IGA strategy is in lock step with your business goals. Get there faster with a pragmatic roadmap that makes sense for your organization.

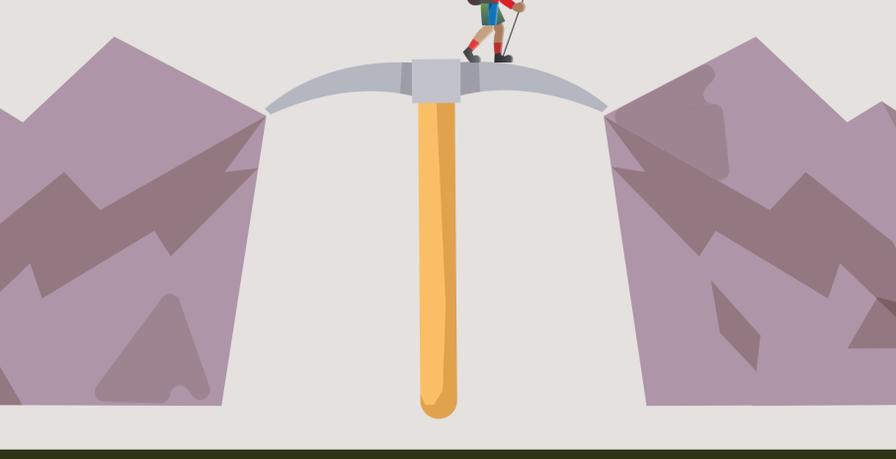

The route: Getting around the unexpected.

2

Avoid complications on your IGA journey with expert advice that can keep you on the right path and clear blueprints to guide your implementation.

Point A  Point B

3

Your companions: With you on the journey.

Whether they are business users, leaders or IT gurus, keep all of your stakeholders working together for a truly business-oriented IGA solution.

Your goal: Not only in sight. It's here now.

4

IBM Security specialists apply the right skills and an effective methodology to help you realize your IGA vision today and as your business evolves.
