

# Business Automation Modernization Workshop

Modernize to the new world of AI infused intelligent automation on container/SaaS based platforms.

IBM's experts will lead a complimentary interactive workshop to assess and identify opportunities to modernize your current deployment. The discussion will cover your current content management, workflow, and decision management implementations. You'll receive a phased optimization and modernization roadmap.

## Preparation Align on workshop expectations and agenda

*1 hour on phone*

- Brief discussion of your current situation
- Agree on workshop objectives, roles and responsibilities
- Get commitment on subject matter expert and stakeholder participation during the workshop
- Confirm potential workshop dates
- Review modernization questionnaire to be completed by the customer

## Workshop Identify and discuss top modernization opportunities

*3 days, virtual*

- Review existing business automation applications, business initiatives and demands
- Review existing development, deployment and operations challenges
- Define transformation logic
- Present IBM Cloud Pak® for Business Automation on containers/SaaS overview and architecture
- Demonstrate business automation features that can benefit you based on observations from existing solutions
- Determine target platform, risks, and define target architecture
- Gather necessary content for a draft modernization roadmap

## Outcomes Capture and present workshop results

*Post-workshop*

- Review assessment findings and high-level target architecture
- Review actionable plan and modernization roadmap
- Prioritize actions
- Agree on any next steps to continue collaboration
