

Five powerful reasons to engage IBM Garage

Access a world of knowledge

Enter a space of multi-industry collaboration and meet acknowledged subject matter experts with deep experience of Red Hat technologies running on IBM IT infrastructure (IBM Z, IBM Power Systems and IBM Storage).

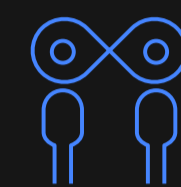

Here are five reasons to join one of the three worldwide established centers of competency for Red Hat :

You can learn how to **boost your IT agility with microservices and container technologies**

You can learn how to **deploy applications on business-driven priorities** across server families and cloud providers

You can learn from the experience of others through **use-cases, demonstrations and design workshops**

You can **test the latest technologies** using our remote hands-on labs

You can **validate your architecture options via prototyping, proof of concept or benchmark** on our infrastructure to consolidate your choices

150

subject matter experts

1500

customer and partner engagements

72

countries

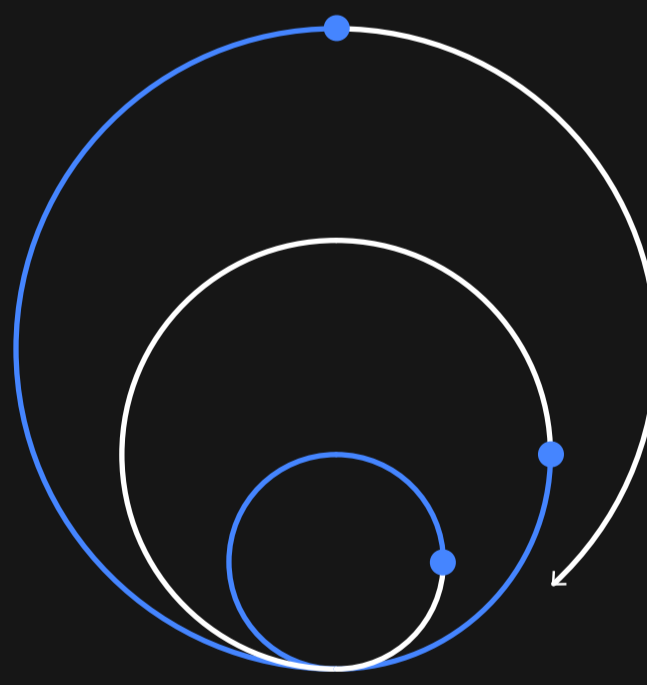

IBM Garage Montpellier has broad capabilities that enable you to understand, explore, and demonstrate your ideas using full-scale systems and infrastructure with the latest IBM technology :

Modernize your infrastructure with container and microservices using OpenShift

Automate your IT infrastructure with Ansible

Elevate data and hybrid-cluster management with Cloud Paks

We aim to create a rich and flexible experience tailored to fit your unique business, your needs and your challenges.

Stay at the core of innovation and accelerate your business with free and perfectly customized ways to integrate your Red Hat and IBM Systems technologies.
