

Technology Expert Labs for IBM Z IntelliMagic Vision for z/OS

Our Technology Expert Labs team can provide a proven approach to implementing IBM Z IntelliMagic Vision for z/OS in your environment, helping you prevent disruptions, reduce costs and maintain availability for critical mainframe workloads

IBM Z® IntelliMagic Vision for z/OS® is advanced performance analysis software for [IBM Z](#). It provides flexible data analysis through custom, no-code visualizations that allow analysts to identify risks and tune workloads. It modernizes mainframe performance analysis with next-level intelligence.

Business challenges

You want to improve your operational health and performance to ensure optimal operations of your z/OS environment and associated subsystems.

Our technical and domain expertise will assist with how to modernize your mainframe performance analysis with next-level intelligence unlocking its full potential to help you achieve business goals via:

- Optimizing your workloads and site configuration to ensure your IBM Z workloads and hybrid applications are running efficiently.
- Providing your team with AI-driven operational insights to proactively identify risks, ensure availability and optimize your z/OS systems environment.

Why use Technology Expert Labs?

IBM Technology Expert Labs is your trusted partner in the mainframe application modernization journey. Our team provides the expertise that enables your team to take control of your end-to-end mainframe environment to prevent availability risks and to manage and optimize performance and costs effectively.

What do we offer?

Implementation Services

Leverage our team's expertise to plan and implement your IBM Z IntelliMagic Vision for z/OS solution, set up your environment, customize dashboards and data processing, establish key thresholds, train your teams and provide a rapid return on your investment.

Assessment Services

You'll be paired with trusted advisors who will follow a proven methodology to collect and analyze operational data from selected z/OS environments to identify performance optimization and risk mitigation opportunities for the z/OS infrastructure and associated subsystems.

Expertise Connect Services

Advisory consulting services provides skills mentoring and assistance to help you deliver optimal operational performance while mitigating risks via:

- Periodic reviews of operational analytics from IntelliMagic for your z/OS infrastructure subsystems and components by consultants familiar with your operational environment.
- Regular, proactive AI-driven, actionable operational insights to prevent risks and optimize your z/OS operations.
