

IBM i Solution Edition with Subscription Term Licenses

Solutions built for business, combining
industry-leading applications with IBM i and
Power

■ Highlights

Integrated solutions for SMBs
through partnerships with
ISVs

Simplified, flexible, and highly
secure infrastructure

Mitigates risks associated
with adopting new
technologies

Speeds implementation time
for deploying new
applications

IBM i Solution Editions are designed to help companies take advantage of the combined experience and expertise of IBM and ISVs by building business value into IT solutions. Through innovation and technology leadership, IBM i Solution Editions help provide maximum flexibility in compute consumption and application choice, providing an answer for the demanding business requirements of today. IBM i Solution Editions combine IBM i with subscription term licenses and IBM® Power® packages designed to be easily purchased from ISVs and IBM Business Partners. By bringing infrastructure, software, licensing, and ecosystem solutions together, the offering helps simplify acquisition and deployment while supporting modernization, operational efficiency, and future growth. The latest evolution of IBM i Solution Editions extends these benefits with a modern infrastructure foundation built on Power11 technology.

IBM Power S1112, powered by Power11 technology, is the primary hardware platform for IBM i Solution Editions. Available in 4-core and 10-core configurations, the Power S1112 provides a right-sized foundation for IBM i clients while delivering additional capacity for growth and complementary workloads. Eligible Power S1112 Solution Edition configurations include three years of IBM Expert Care. With Power11 technology and IBM i, companies benefit from a highly integrated infrastructure and operating system designed to minimize complexity, automate processes, reduce downtime, enhance security, and improve operational efficiency. The Power S1112 also provides clients with a modern platform for application modernization, hybrid workloads, and emerging AI use cases while keeping business-critical IBM i applications and data at the core of the solutions.

IBM i Solution Editions

IBM i integrates a relational database (IBM® Db2® for i), security, web services, networking, and storage management capabilities. It provides a broad and highly stable database and middleware foundation for efficiently deploying business processing applications, which enables a lower total cost of ownership when compared with other operating environments. Together, IBM i and Power are offered through an extensive, highly skilled, and worldwide network of IBM Business Partners that is backed by trusted IBM services and support infrastructure. IBM developers, fully tests, and preloads the core middleware components of IBM i together, helping companies deploy applications faster and maintain them with fewer staff. Combined with the IBM Power S1112, IBM i Solution Editions provide a modern and integrated infrastructure foundation designed to support business-critical workloads, future growth, and application modernization.

The IBM Power S1112 is the primary hardware platform for IBM i Solution Editions and is available in eligible 4-core and 10-core configurations, including three years of IBM Expert Care. IBM i Solution Editions also include IBM Power Virtual Server cloud credits for new clients, allowing them to try Power Virtual Server at no cost. The IBM i Solution Edition configurations can be expanded, allowing for flexible quantities of memory, disk, and network adapters to address infrastructure requirements. With Power11 technology, the Power S1112 provides a modern foundation for business-critical IBM i workloads while offering capacity to support future growth. Additional system capacity can also be used for complementary AIX, Linux, VIOS, and AI workloads alongside IBM i, helping clients consolidate infrastructure and extend the value of their investment.

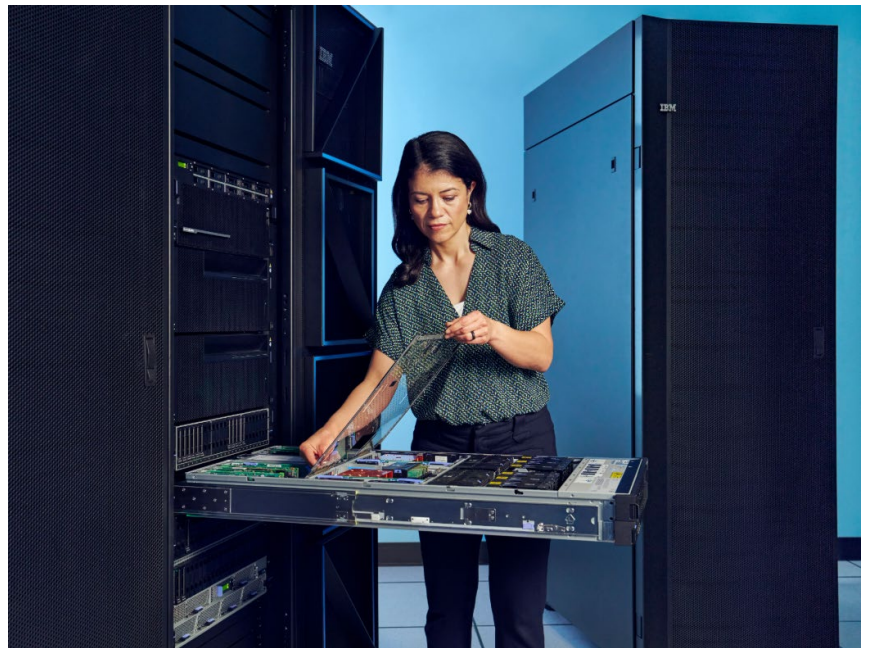

IBM i Solution Edition	Power S1012 1 and 4 cores	Power S1112 4 and 10 cores
Edition feature codes	#4948, #4968	#4968, #4978
IBM i processor Subscription (min 1)	Standard price	Standard price
IBM i user Subscription (min 10)	Reduced price on initial purchase	Reduced price on initial purchase
Rational Development Studio (5770-WDS) Subscription	Reduced price on initial purchase	Reduced price on initial purchase
IBM PowerVS Cloud Credits (available to new clients)	2000	2500

Qualification	Power S1012 1 and 4 cores	Power S1112 4 and 10 cores
Must be a new purchase, ordered with an IBM i Solution Edition feature code	Yes	Yes
Must have proof of purchase for software, maintenance, services and/or training from a registered ISV	Yes	Yes
Proof of purchase from a registered ISV must be dated within 90-day window of hardware order	Yes	Yes
The combined value (software, maintenance, services, training) of the registered ISV purchase must be	USD 6,500	USD 6,500
Purchase amount must be from one registered ISV only, it cannot be combined from multiple	Yes	Yes
Total registered ISV purchase amount must be traceable to the specific machine serial number to be applicable	Yes	Yes

IBM i Solution Editions bring together IBM i, IBM Power, and leading ISV solutions in a simplified offering designed to help clients modernize with confidence. With the IBM Power S1112 as the primary hardware platform, clients can choose right-sized 4-core or 10-core configurations built on Power11 technology, with three years of IBM Expert Care included. The solution provides a secure and integrated foundation for business-critical applications while offering the capacity and flexibility to support future growth and complementary workloads. Combined with subscription term licensing, eligible software benefits, and IBM Power Virtual Server cloud credits, IBM i Solution Editions help reduce complexity and simplify infrastructure investment decisions. Together, IBM and its ecosystem of Business Partners and ISVs provide clients with a modern platform designed to improve operational efficiency, support application modernization, and deliver long-term business value.
