IBM RapidMove
for Oracle Cloud

Migration to Oracle Cloud can be slow, expensive and sometimes does not deliver the business value you need

Pure technical upgrade approaches may deliver fast but they:

- Cannot deliver business transformation
- Do not exploit the full features of SaaS
- Do not provide any Rollout option beyond big bang

Conversely, traditional greenfield implementations can deliver business transformation but oftentimes they are:

- Costly
- Slow to deliver
- Over-run and consume massive amounts of internal resources

IBM RapidMove for Oracle Cloud delivers fast while unlocking the full value of business transformation

Save up to 60% in process design through the adoption of our pre-configured industry specific Cognitive Enterprise Blueprint. Documented in IBM's leading process modeling tool IBM BlueWorks, mapped directly to the APQC framework, our Blueprint delivers over 350 level 4 Oracle ready business processes.

Save 80% in configuration time through our Oracle Cloud Configuration Injector, able to pump data into any environment, maintain a Gold Copy offline, produce documentation and enable transformation between instances.

Save 40% on integration design and build using the 50+ Cloud integration adaptors to systems including **ADP, Maximo, Taleo, Concur, Blockchain and all legacy Oracle platforms.** Deliver integrations through the IBM Utility Integrator, a framework to rapidly integrate 3rd parties into the Cloud, underpinned by our Error logging and Monitoring framework to **reduce time spent resolving defects by 20%.**

Save 40% on data migration, designed and built via our 40 Oracle Cloud ready adaptors handling extract, transform and load.

Save over 60% on reporting design and build through the IBM Reporting Pack for Oracle Cloud, delivering over 100 role specific KPI's and 50 of the most common requirements in OTBI.

Save 40% on test execution. IBM Test Automation for Oracle Cloud delivers over 400 scripts in open source technology including the ability to auto-capture screenshots for audit purposes.

Deliver **personalized, co-created and social change interventions** through IBM's Digital Change under-pinned by rapid delivery of training material for both power and self-service users. **Save 60% in training development through pre-built learning paths,** interactive job aids and contextual support inside the application.

Throw away the old ways of implementing technology.
IBM RapidMove for Oracle Cloud:

Redesigns and standardizes your business processes to enable a platform to exploit the exponential technologies of intelligent workflow and pervasive automation

Eradicates manual steps in systems configuration to rapidly create new instances, inject flexibility in the release plan and **improve quality**

Assetizes major streams including data migration, systems integration, reporting, testing and learning development to **accelerate delivery and reduce demands on both business and IT**

Embeds successful business change into the heart of the programme, engaging stakeholders through modern and effective channels, supported by **business benefit driven KPIs and finally;**

Harnesses rollout flexibility through support for any deployment option

Why IBM

35
year partnership with Oracle

10,000+
Dedicated Oracle consultants

2,000+
Oracle Cloud certifications

375+
Oracle Cloud go-lives

10+
Oracle-specific delivery centers
